Comprehensive Guide to binance smart chain programming language

This matters because markets don't move in straight lines. BNB's 6% daily gain and 21% weekly surge attract short-term traders looking for quick flips. Once momentum stalls—and it always stalls eventually—those traders rush for exits simultaneously, creating violent corrections that wipe out leveraged positions in minutes.

Tempo is still in the works and will be a stablecoin and payments-focused L1 with Stripe essentially being in control of the network. Its ethos marks a stark contrast to Ethereum's decentralized and open-source nature, given that it will be a

corporate-controlled chain.

AI chatbots DeepSeek and Qwen3 Max, both developed in China, led the ongoing crypto trading experiment on Wednesday, with the former being the only AI model to generate a positive unrealized return of 9.1%.

The Bitcoin-to-gold ratio has plummeted to levels historically associated with market bottoms, last seen in 2015, 2018, 2020, and 2022. Each time, Bitcoin followed with rallies between 100% and 600%.

The cumulative total net inflow in spot Bitcoin ETFs now stands at \$61.50 billion, with total net assets slipping to \$149.66 billion, or about 6.76% of Bitcoin's market capitalization.

"We will learn from the prototype, make it better, and then integrate the tech into ChatGPT to make it real-time and maximally helpful," he said.
