Comprehensive Guide to binance smart chain wallet app download

Speaking on the derivatives market, crypto analyst Pelin Ay offered a more nuanced view of the market's structure, noting that funding rates remain positive but restrained, signaling a market dominated by longs but not yet euphoric.

DOGE is up around 1.6% today and changing hands just shy of \$0.20. The meme coin has dropped by 25% in the last month and is now more than 72% off its 2021 all-time high of \$0.73.

The flash crash sent open interest in perpetual futures plummeting from \$26 billion to under \$14 billion, while decentralized exchange (DEX) trading volume surged past \$177 billion, and crypto lending fees hit an all-time high of \$20 million.

“The Federal Reserve's September meeting is a dominant macro catalyst,” he said, alluding to the September 16 and 17 Federal Open Markets Committee meeting. “With a potential US rate cut on the horizon, liquidity conditions could ease, increasing demand for risk assets and potentially boosting Bitcoin by 5-10%.”

And for the casual observer: Enjoy the ride. Parabolic rallies are beautiful until they're not, and in crypto, the transition from “beautiful” to “brutal” can happen in hours.

The November election will determine whether CalPERS continues its current approach of indirect crypto exposure or potentially opens discussions about direct digital asset investment.
