ETF inflows must return and new ETH buyers must step in for the bulls to have a shot at getting back to \$5,000.

The campaign's gamified nature has also led to community engagement across social platforms, with participants sharing their progress, NFT achievements and referral milestones. This activity is generating continued interest in the campaign as it moves into its next phases.

A high hash rate is important because it means more computing power is being used to keep the cryptocurrency's network secure. And the more computing power

used, the harder it is for attackers to take control of more than 50% of the Bitcoin network.

The UK launch follows the runaway success of BlackRock's U.S. spot Bitcoin ETF, which became the firm's most profitable fund just 21 months after launch, now managing over \$87.5 billion in assets.

The phrase “code is law” is generally attributed to the academic Lawrence Lessig. The first chapter in his 1999 book “Code: And Other Laws of Cyberspace” is titled “Code is Law” and draws an analogy between the power vacuums percolating in Eastern Europe at the time (someone should check in on that) and the internet.
