But here's where things get interesting: BNB has been riding a powerful parabolic support line since mid-year. The chart shows a clear parabolic advance—the kind that can deliver explosive gains but also tends to end with equally explosive corrections. Looking at the projection, if this trajectory continues uninterrupted, BNB could be trading near \$2,000 by December 31, potentially delivering another 67% gain from current levels over the next 89 days.

He said that we've previously had two cycles superimposed based upon the Bitcoin halving events every four years and the M2 global money supply.

China produces over 90% of the world's rare earth minerals and rare earth magnets used in electronics manufacturing, according to Reuters. The announced export restrictions on rare earths won't just reshape supply chains, but the entire global monetary order, Gromen said.
