Did you know? Crypto's "weekend effect" isn't just folklore. Studies show trading volume on weekends is 20%-25% lower than on weekdays.

In his Monday blog post, which drew on his Sept. 15 paper pushing the same idea, he argues that a communication system should be established where law enforcement agencies can directly query crypto firms for investigative purposes.

The milestone is expected to redefine the protocol's economic and technical architecture, introducing a modular "hub and spoke" design.

Derivatives can reveal early clues. When perpetual funding turns deeply negative (shorts paying longs) into the dip, the short side is overcrowded, creating the perfect setup for a sharp reversal.

Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.
