The spot volume delta metric, an indicator that measures the net difference between buying and selling trade volumes, reveals that net spot buying on exchanges remains negative, despite the recent attempts at recovery.

Why these three? Each has strong brand recognition, decent liquidity and different strengths: BTC as the store-of-value, ETH with its smart contract ecosystem and XRP with fast settlement and cross-border payments. Together, they cover what businesses need: trust, functionality and speed.

A business cycle downturn is a period of economic contraction where GDP declines, unemployment rises, consumer spending falls, and business activity slows. It is also commonly referred to as a recession and typically follows periods of expansion.

He believes this outlook bodes well for a sustained rally through the year's end, noting that "historically, October through December are the most active and bullish months for Bitcoin."

The rise of NFTs (Non-Fungible Tokens) has brought revolutionary changes to digital content creation and trading. Based on blockchain technology, NFTs ensure the uniqueness and immutability of digital assets, solving the problem of digital content being easily copied. NFTs have a very wide range of application scenarios, including digital art, game items, virtual real estate, music works, etc. The rapid development of the NFT market has attracted the participation of many artists, collectors, and investors, and has also provided creators with new monetization channels. Although there are risks of speculation and bubbles in the NFT market, in the long run, NFTs will inject new vitality into the development of the digital economy.

A significant share of that exposure comes from Tether, the market leader, which holds roughly \$127 billion worth of Treasury bills.
