OKLink is a professional-grade, multichain blockchain explorer developed under the OKG Technology Group. It supports major blockchains such as Ethereum and Bitcoin, offering robust tools for transaction tracking, stablecoin monitoring and onchain risk analysis. Known for its strong compliance and Anti-Money Laundering (AML) features, OKLink is widely used by analysts, compliance teams and institutions that require deeper blockchain visibility beyond basic transaction searches.

Back in February, Kaspersky had warned that malware was being distributed through GitHub repositories widely used by coders. If downloaded, it could hijack the victim's keyboard and replace wallet addresses with ones controlled by the attackers.

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.
