The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.

Although Galaxy’s business focuses on financial services and asset management, the company is also engaged in data center infrastructure. The firm said it

remained on schedule to deliver power to AI cloud computing platform CoreWeave in the first half of next year.

“Evaluate how likely the current X-driven pump for [TICKER] is organic. Cross-reference recent GitHub commits, official releases, known vesting schedules and the largest onchain transfers in the past 72 hours. Provide a confidence score 0-10 and list five specific verification links.”
