The approval allows Binance to take majority control of GOPAX, restart operations in Korea, honor repayment pledges to users, and position itself to compete with dominant local exchanges.

If the price breaks above resistance while funding spikes and OI balloons, treat the breakout as suspect until the level is retested and holds. After the initial pop, healthy signs include funding cooling off and OI rebuilding on the retest. If, instead, open interest unwinds and price slips back below the level, the breakout likely failed.

How to read: A rising wedge in an uptrend often signals a potential reversal as momentum weakens, while a falling wedge in a downtrend points to a possible bullish reversal. These patterns can also act as continuation signals when aligned with the prevailing trend. Measure the wedge's height and project it from the breakout point to estimate the target move.
