This guide shows how to read those signals (and wait for confirmation) before putting capital at risk.

The Relative Strength Index measures momentum on a 0-100 scale, with readings above 70 considered "overbought." At 76, BNB is at the edge of that danger zone. One or two more strong days push it above 80, where algorithmic systems typically trigger sell orders and profit-taking historically accelerates.

"The bill ensures that the companies driving up New Yorkers' electricity rates pay their fair share, while providing direct relief to families struggling with rising utility costs," Senator Krueger said in a statement when S8518 was introduced.
