Decentralized exchange Hyperliquid introduced a new update that allows third parties to launch their own perpetual swap contracts on its platform.

"The short-term trend—that began with the big liquidation event earlier this month—is down and traders might want to test the technical support in the \$100,000 and \$3,800 levels for BTC and ETH several times before there's either a sustainable rebound or a sharper move lower," he said.

Crypto needs VCs “for now” to bridge global capital gap, Lubin says

While some market observers believe that the traditional crypto four-year cycle is about to be broken, analysts told Decrypt this week that they believe some traders are still following the classic rulebook—and selling due to the expectation of falling prices ahead.

Ripple's acquisitions and partnerships are part of the company's broader effort to challenge the SWIFT interbank messaging system, the standard protocol used by the world's financial institutions to shift money around the world.

WBTC requires trust because the Bitcoin backing it is held by a centralized custodian who must be trusted not to lose, freeze, or misuse the funds. Users depend on this custodian's honesty and solvency rather than cryptographic guarantees. This is the primary issue addressed by Babylon's trustless implementation.
