Some analysts speculated that up to 99% of creditors might sell once they received their share. But when repayments actually began, there was “no significant spike” in trading volume, according to CryptoQuant founder Ki Young Ju.

Timing and catalysts: Off-hours and weekends mean thinner books, while listings, unlocks and headlines can distort price. Let the retest decide.

The US dollar’s hegemony is over, as evidenced by China’s recent announcement of export controls on rare earth minerals, a critical component in electronics

manufacturing and military defense applications, according to analyst Luke Gromen.

If the price breaks above resistance while funding spikes and OI balloons, treat the breakout as suspect until the level is retested and holds. After the initial pop, healthy signs include funding cooling off and OI rebuilding on the retest. If, instead, open interest unwinds and price slips back below the level, the breakout likely failed.
