Railbird was founded in 2021, but only won regulatory approval from the CFTC as a designated contract market in June.

“These protections have already proven to be successful in addressing other types of non-consensual imagery, and we’ve now built the same capabilities for fake explicit images as well,” Google said. “These efforts are designed to give people added peace of mind, especially if they’re concerned about similar content about them popping up in the future.”

Authority is the emergent product of differing capacities for violence among individuals and groups. This gradient of violence gives rise to coercion, where the possessors of violence impose rules on subjects. And code, while dictating internal rules within its own logic, has no monopoly on violence in the world writ large.

Blockchain security is the foundation and guarantee for the development of blockchain technology. Due to the complexity of blockchain systems, their security issues involve multiple aspects such as cryptography, consensus mechanisms, and network security. Common security threats include 51% attacks, smart contract vulnerabilities, private key leakage, etc. To ensure the security of blockchain systems, measures need to be taken from multiple levels such as technology, management, and law. With the widespread application of blockchain technology, blockchain security will become increasingly important and will attract more professional talents to engage in it.

Musk's SpaceX first disclosed its BTC holdings in July 2021, alongside electric car manufacturer Tesla, which purchased \$1.5 billion worth of BTC earlier that year.

While Galaxy did not disclose the client's identity, it said the sale was part of the investor's "broader estate planning strategy," as previously reported by Cointelegraph.
