Publicly traded companies are increasingly accumulating BNB, the native token of Binance's layer-1 blockchain BNB Chain.

GalaxyOne offers customers the ability to trade stocks and crypto in one place, mirroring services offered by Robinhood and Kraken. At the same time, Galaxy is targeting accredited investors with products like high-yield cash that aren't universally available.

“I think that most fiat currencies, especially those with large debts, will have problems being effective storeholds of wealth and will go down in value relative to hard currencies,” he said, pointing to parallels between the coming years and two periods in the 20th century.

A Uniswap engineer said the team did not specifically build the integration for Solana, but rather designed “architect layers” that were platform-agnostic.

“If you want to say that cryptocurrency is this shining horse, ‘an angel from on high,’ you’re bullshitting,” he said. “You have this permissionless open platform that has a lot of different things going on that most people do not understand.”
