Blockchain technology is rapidly developing worldwide, becoming an important driving force for digital transformation. As a distributed ledger technology, blockchain ensures data security and immutability through decentralized means. In the financial sector, blockchain technology has begun to transform traditional payment, clearing, and settlement processes, improving efficiency and reducing costs. At the same time, blockchain has shown tremendous application potential in various fields such as supply chain management, healthcare, and public services. With the continuous maturity of technology, we have reason to believe that blockchain will lay a solid foundation for the future digital economy.

Trust companies, for example—which custody crypto assets—may not be considered legally eligible for “skinny” master accounts, given their current inability to receive deposits, Long warned.

It is not clear which incidents were formally organized by the group and which are the result of other people jumping on the bandwagon.

Research firm 10x Research also reported on Saturday that major DATs such as Metaplanet and Strategy were trading near or below their NAVs.
