He added that US political turbulence has deepened the cautionary mood. “The erosion of trust in policy stability is pushing capital toward defensive plays,” Liu noted.

Notably, SearchGPT appears to replace Microsoft Bing with its own technology. The videos shared by OpenAI don't show the typical banner indicating that search results are powered by Bing, as with the current version of ChatGPT. And while Google has been integrating AI into its services, SearchGPT's advanced capabilities clearly pose a significant threat.

The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.

The cycle repeats in the early 2020s, with an examination of a lesser-known hack of Indexed Finance. The exploit was allegedly perpetrated by an attacker alternatively named Umbril Upsilon and Zeta Zeros, who would eventually be identified as the teenager Andean Medjedovic.

The Bank Policy Institute and Kentucky Bankers Association filed a lawsuit the same day the rule was finalized, saying it mandates data sharing without proper oversight of third parties, increases fraud risk by allowing unsafe practices like screen scraping, and forces banks to provide free access to systems they've spent billions securing.

“Blockchain and other innovative technologies can counter these emerging risks. Treasury and other policymakers should promote their use to identify and deter illicit activity.”
