mining company by market capitalization, announced a new strategy to expand into AI data center infrastructure, aiming to diversify its revenue streams and strengthen long-term cash flow potential.

VC participation remains necessary to bring the “progressive decentralization” needed to achieve a “secure global information infrastructure,” explained Lubin.

The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.
