How to read: Breakouts often follow the existing trend but can occasionally reverse it. Estimate the price target by measuring the base width of the triangle and projecting it from the breakout point. A breakout upward in an uptrend is typically bullish, while a breakdown in a downtrend is bearish. To avoid false signals, use a 1%-2% filter before confirming a move.

The exchange responded to the criticisms by launching a \$400 million relief program for eligible traders and institutions affected, as well as a \$45 million BNB airdrop for memecoin traders who suffered losses during the crash.

“At the same time, various traditional managers are expanding their digital-asset footprint, including tokenized securities in BlackRock’s case,” he added.
