regulated financial products, turning crypto ETPs from simple price trackers into income-generating assets. The initiative marks a key advance in institutional adoption. Regulated staking on Ethereum and Solana could draw substantial new capital to these networks while acting as a model for products linked to other PoS blockchains or tokenized assets.

Together, they account for about a quarter of the country's \$4.3 trillion (US\$2.8 trillion) superannuation pool, according to data released by the Australian Prudential Regulation Authority last week.

Etherscan is a blockchain explorer designed for the Ethereum ecosystem. It's widely used by individuals, developers and institutions to verify transactions, monitor smart contracts and analyze token activity. Its reliability and extensive onchain data make it one of the most trusted tools for tracking Ethereum network activity.
