The competition began with \$200 in starting capital for each bot before increasing to \$10,000 per model, with trades executed on decentralized exchange Hyperliquid.

That includes analyst Pat, who predicted a “generational bottom” for Bitcoin, citing its performance relative to gold over the past four years.

“The important element of blockchain is a system that gets rid of a central entity. It comes at a cost: A very complex technology that’s hard to build and hard to use. Even if we apply AA to create simplified UX, the tech under the hood is still very complex,” he said, presumably referring to account abstraction, a technology that makes wallets smarter and easier to use.

Unlike a company’s stock market cap, which is based on outstanding shares, the market cap of gold is a calculation of the total value of all the gold that has ever been mined; however, it is impossible to know the exact amount.
