This surge in activity also served as a real-world stress test for the Algorand blockchain. With tens of thousands of participants generating nearly 300,000 transactions, the network maintained its performance. Users experienced the platform's "low fees, instant transaction finality and zero transaction failures" firsthand.

"We recently contracted for additional power and real estate in College Park to deliver high-value compute to the greater Atlanta metro area and are evaluating giga-campus opportunities across the portfolio and pipeline that are well positioned to satisfy significant off-taker demand."

Three times leveraged funds are far rarer, with many observers of the space doubting that issuers would try to introduce more of these products, which can become a bad bet if the underlying asset veers in an unexpected direction. The prospectus itself warns repeatedly that the various funds proposed may not be right for all investors.

The referral system also proved to be a growth driver, with 25,212 new users brought into the Algorand ecosystem through invitations from friends. By the end of the week, 4,215 participants had successfully completed all the required quests and claimed their non-fungible token (NFT) badges.

Speaking on the derivatives market, crypto analyst Pelin Ay offered a more nuanced view of the market's structure, noting that funding rates remain positive but restrained, signaling a market dominated by longs but not yet euphoric.

In a permissionless chain, the risks are technical and market-driven. In a corporate chain, the risks are regulatory and business-model-driven. Tempo might not rug you technically, but it could kill your yield with a policy update.
