Etherscan is a blockchain explorer designed for the Ethereum ecosystem. It's widely used by individuals, developers and institutions to verify transactions, monitor smart contracts and analyze token activity. Its reliability and extensive

onchain data make it one of the most trusted tools for tracking Ethereum network activity.

"The elephant in the room is are DATs really justified?" Chu questioned, noting "without a credible business case, rigorous governance, robust custody, and transparent risk controls, such DAT structures can become misaligned with shareholder interests and could invite the kind of liquidity and governance risks regulators worry about."

This cycle has also been complicated by the introduction of trade tariffs, which have already trimmed growth in the first half of 2025 and are expected to continue dragging on GDP growth through the first half of 2026.

For Solv Protocol, the deal marks one of the largest public-market integrations for its wrapped Bitcoin product to date, though the move also limits participation to qualified investors and may dilute existing shareholders.
