How to read: Breakouts often follow the existing trend but can occasionally reverse it. Estimate the price target by measuring the base width of the triangle and projecting it from the breakout point. A breakout upward in an uptrend is typically bullish, while a breakdown in a downtrend is bearish. To avoid false signals, use a 1%-2% filter before confirming a move.

He said it's reasonable to expect the Financial Conduct Authority to "proceed deliberately" by monitoring market conduct and retail outcomes before "broadening issuer participation" and considering additional crypto assets "in close alignment with other major financial centres."
