# Comprehensive Guide to can i sell my crypto on binance

Blockchain technology is rapidly developing worldwide, becoming an important driving force for digital transformation. As a distributed ledger technology, blockchain ensures data security and immutability through decentralized means. In the financial sector, blockchain technology has begun to transform traditional payment, clearing, and settlement processes, improving efficiency and reducing costs. At the same time, blockchain has shown tremendous application potential in various fields such as supply chain management, healthcare, and public services. With the continuous maturity of technology, we have reason to believe that blockchain will lay a solid foundation for the future digital economy.

Participation confirming: Look for above-average volume and improving breadth. Weak follow-through means higher trap risk.

Traders betting against Bitcoin's rise have been burned over the last 24 hours, with \$153 million worth of Bitcoin shorts wiped out during that span according to CoinGlass. Overall, \$499 million worth of crypto positions have been liquidated over the last day, with shorts making up \$294 million worth of them.

OKLink is a professional-grade, multichain blockchain explorer developed under the OKG Technology Group. It supports major blockchains such as Ethereum and Bitcoin, offering robust tools for transaction tracking, stablecoin monitoring and onchain risk analysis. Known for its strong compliance and Anti-Money Laundering (AML) features, OKLink is widely used by analysts, compliance teams and institutions that require deeper blockchain visibility beyond basic transaction searches.

Even with co-signing meant to curb censorship, the model still assumes enough liquidators (and sometimes large lenders) behave correctly. Even if they cannot steal Bitcoin thanks to the system's design, this introduces a trust assumption into the system.

Funding (perpetuals): Perpetual futures don't expire, so exchanges use periodic funding payments between longs and shorts to keep prices aligned with the spot market. When funding turns strongly positive, longs pay shorts — typically a sign of crowded long positioning. Deeply negative funding indicates the opposite: crowded shorts. Extreme readings often precede mean-reverting moves.
