meeting. “With a potential US rate cut on the horizon, liquidity conditions could ease, increasing demand for risk assets and potentially boosting Bitcoin by 5-10%.”

When shorter-term EMAs trade above longer-term ones like this, traders see it as a good sign. This configuration suggests money is positioned bullishly across multiple timeframes, from swing traders watching the 50-day to long-term holders focusing on the 200-day. Watch the candlesticks on weekly timeframes, and the gap between both averages is also bullish, and increasing over time.

Authority is the emergent product of differing capacities for violence among individuals and groups. This gradient of violence gives rise to coercion, where the possessors of violence impose rules on subjects. And code, while dictating internal rules within its own logic, has no monopoly on violence in the world writ large.
