Lee told CNBC after the trading day on Friday that investors were still “licking their wounds” from the record leverage flush, but there was also a bit of “gold envy” as the commodity has been a “huge performer this year.”

While AI tools can help spot market trend shifts for day traders via social media and technical signals, traders still can’t rely on them for autonomous trading.

Crypto price charts visually represent price movements across different timeframes, providing insights into trends, volatility and trading opportunities. In a fast-paced crypto market, open-high-low-close (OHLC) data enables investors to track price changes within specific periods, forming the core of technical analysis.
