The difference between the crypto trading performance of the AI models likely stems from their training data, according to Nicolai Sondergaard, research analyst at crypto intelligence platform Nansen.

Creditors will sell U.S. debt as they grow worried about its ability to function as a store of value, he said. That will likely put the Federal Reserve in a tough position, Dalio added, where it has to decide between rising interest rates and a debt default crisis or printing money to buy debt and “try to hold real interest rates down, which will lower the value of money.”
