“So as we move dollars onto the blockchain, which is stablecoins, we’ll move stocks and real estate,” he said.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.

DeepSearch helps you go from a noisy tweet storm to a consolidated set of primary documents: white papers, token contracts and press releases.

Bitcoin, which has long been criticized for volatility as one of the key arguments against being a legitimate store of value, has also slipped 5.2% from its intra-day high of \$114,000, though daily losses were about 0.8% at the time of writing, according to Coinbase data.
