ETH derivatives markets show no alarming signs — quite the opposite. Bulls' hesitation to take on leveraged positions appears healthy, particularly after the Oct. 10 extreme volatility. However, Ether's path toward \$4,500 will likely depend on clearer signals from credit conditions and US labor market data, meaning any recovery could take time.

The difference between the crypto trading performance of the AI models likely stems from their training data, according to Nicolai Sondergaard, research analyst at crypto intelligence platform Nansen.

Details about how the firm will fund the initiative were not revealed, but it expects to make the first strategic purchase “in the near future.”

Meanwhile, a new variant of XCSSET has emerged that can take screenshots, record what a user is doing, and steal data from their Telegram account.
