1 ZH/s means that per second, the computers securing the Bitcoin network are doing one sextillion (1,000,000,000,000,000,000) hashes every second—an absurdly large number.

This guide shows how to read those signals (and wait for confirmation) before putting capital at risk.

With Google's new update, when a request to remove non-consensual deepfake websites found in a search is received, Google will also work to filter similar search results that include the name of the person being impersonated.
