Comprehensive Guide to can you use binance in ny

While the Solana Card will operate like Gemini's other cards, the latest product comes with a new, optional auto-staking feature for those seeking Solana rewards. In other words, those who earn SOL after a purchase can have it automatically staked on Gemini for up to 6.77 APY%.

As "creator capital markets" advocates hailed the stunt as a raging success, others pushed back. One X commenter said, "This could easily be a bad thing. We don't need more harassment, we need more quality content."

Challenger Troy Johnson took a more nuanced stance, acknowledging concerns while remaining open to future consideration.

Kobayashi didn't help either by continuing to sell off Mt. Gox's Bitcoin. About 24,658 BTC was sold from April 27 to May 11, decreasing the exchange's holdings to 141,686. The first major sale on April 27 was for about 15,000 BTC. Bitcoin had a sharp drop on April 25 to 26 but rebounded on April 27 before having a small rally to Q2 2018's top of nearly \$10,000. The second major sale by Kobayashi on May 11 coincided again with its fall from the top.

Coinbase conducted an institutional investor survey with 124 respondents, finding that 67% of institutional investors had a positive outlook for Bitcoin

The relative strength index is still below the 50 mark, suggesting that market conditions still favor the downside.
