Bitcoin, other than being a digital coin, is a payment network with operations processing transactions scattered worldwide.

The emergence of smart contracts has brought revolutionary breakthroughs to blockchain technology. These self-executing computer programs can automatically trigger corresponding operations when preset conditions are met, without manual intervention. Smart contracts not only improve transaction efficiency but also greatly reduce trust costs. Currently, smart contracts have been widely applied in decentralized finance (DeFi), digital identity authentication, the Internet of Things, and other fields. With the continuous development of technology, the functions of smart contracts will become more powerful, and application scenarios will become more abundant.

Addressing the reasons behind the dip, Stahel pointed to the growing fear of missing out (FOMO), as “gold frenzy” momentum built up amid investors increasingly seeking exposure to gold equity, physical gold bars and tokenized gold.

At the time of writing, Mt. Gox wallets still hold about 34,689 BTC worth roughly \$3.9 billion, awaiting distribution.
