Weyer 5.0 out of 5 stars Spend the money and purchase this photo printer. Im sort of a challenged person when it comes to setting up electronic stuff. But this was an easy setup. The prints are comparable to CVS etc. Plus the creative option on this printer lets you do more things to your prints.

This has a nice carry handle so you can take it anywhere that has a hookup for your power cord. The pics are pricier than at CVS but you have the convenience of printing them almost anywhere. Also be smart and buy extra picture pks. This does not come with any. I have a regular size allinone printer but for photos only this cant be beat. I have been looking at these for a couple of years now. Our 3rd grandchild is less than a year old and I can immediately print pics right after I take them. Plus we live in an RV nearly 7 months of the year and I now I wont have to wait to get my pics printed. Plus the size of this is very convenient. As a few other people have said, all I can say is WOW. This was one of my best purchases in a long time. I thought I had ordered enough printer pks but now Im going to order more. I do not want to have to search for more in case I run out as well be snow birds heading south in just a few weeks and I want to make sure I have enough pic pks. I have also ordered a similar Selphy printer for a christmas gift and hope she likes hers as much as I like mine. Dont put off ordering one of these and I really recommend the Selphy ES40. To put it simplyits just the greatest. So glad Cannon designed these. ThankYouIt prints a photo in about a minute and, I have to say, the print quality is phenomenal. Its the closest thing to film print quality Ive seen from a printer. Setup is a snap. you open a cartridge, open the cartridge door on the side of the printer, take out the cleaning cartridge, remove the orange retaining clip from the back of the new cartridge, insert it into the printer and close the door. Now, youre ready to print. My only complaint is that the Photo effects, which are available on the printer, are not included in the software for your computer. Oh yeah, While you can hook up a USB cable to your Selphy and print from your computer, you can

also use it completely independent of a computer.

I was also, however, tired of prints never coming out right, paper that was reluctant to feed, near interminable waits, etc. This printer is the modern day equivalent of a Polaroid camera. You just insert the cartridge for 50 photos, easily select the photo via the dial which works very much like Canon cameras or like an iPod, you can spin it or click each of the four directions, then press the print button. Out comes the picture with no fuss. It wont smudge and watching each color layer appear in succession is interesting, too. You must order it separately. And while the lab will certainly be cheaper, itll also take a lot longer and a trip to the store or waiting for the delivery. We got this printer to replace what Polaroids used to do.It does that wonderfully.Yes, it take long to print a single photo but the wait is worth it for the quality of the print. I wish it had large print version.Take it to family reunion, my DIL is school teacher she uses with her students. Everything about this printer is fun, cool, and neat. But that is fine with me.Everyone that sees it thinks its so cool. I love the easy of use. Being able to format from the printer is its most attractive feature.I wished I had bought 2 at that time. Anyway this is a great product the pictures come out fast clear and glossy I love it.Love, love, love it!!! I take it everywhere I go with my camera. They go hand in hand. I have owed several printers and this one is by far the best. I only wish the ink and paper could be purchased somewhere other than just Amazon.com. That isnt always convenient for me.
