Guide d'utilisation de l'appareil photo

When recharging ends, the indicator turns off and the LCD monitor turns on. The time required for flash recharging will change depending on usage conditions and remaining battery power. Press the button. Camera shake may not be fully corrected when shooting with slow shutter speeds, such as with evening shots. Use the Auto ISO Shift p. 75, or fix the camera using a tripod to shoot. Adjust the ISO Speed. Beach Shoots without making people appear dark near water or sand where reflected sunlight is strong. Fireworks Captures fireworks in the sky sharply and at optimal exposure. You can set the ISO speed, exposure compensation and white balance. Set the mode dial to Shoot. Faster shutter speeds allow you to catch an instantaneous image of a moving subject, while slower speeds create a flowing effect and allow you to shoot without a flash in dark areas. When you set the aperture value, the camera automatically selects a shutter speed to match the brightness. Selecting a lower aperture value opening the aperture allows you to blur the background and create a beautiful portrait. Therefore, even if an aperture value is preset, the aperture value may automatically be reset to match the synchronized flash speed. Aperture Value Display The larger the aperture value, the smaller the lens opening, allowing less light to enter the camera. Set the mode dial to Configure the shutter speed and aperture setting. 1. Press the button to select the shutter speed or aperture value. When you select a fast shutter speed or shoot a subject that appears dark, set the flash to Flash on to make the LCD monitor display. The recording time will differ according to the memory card used p. 204. Standard You can select the recording pixels and record until the memory card is full. The digital zoom can be used while shooting in this mode p. The combined digital and optical zoom factor will display on the LCD monitor. When the zoom factor displays in blue, the image will deteriorate.

You can use digital zoom during movie shooting in mode only. Focus Display on while the LCD. Recording will cease when the shutter button is released. To Cancel Continuous Shooting Follow procedure 1 to display and manual focus modes, will not display be selected. If the area around the eyes is red, for example from using red eye shadow, that area may also be corrected.Zooming the AF Frame and Shooting The AF frame area can be zoomed to check focus while shooting.Frame color Content Orange Displays the area of the image shown at the bottom right. White Indicates the AF frames or the positions of faces that were used for focusing when shooting. The camera is

continually focusing on whatever it is aimed at Continuous even when the shutter button is not pressed, allowing you to shoot without missing opportunities. The camera only focuses when the shutter button is pressed Single halfway, conserving battery power. In addition, the camera meters the subject so that the face is correctly illuminated when the flash fires. Select a face you wish to focus on. 1. Press the shutter button all the way to shoot. In the following cases, the face select mode will be canceled. Cancel the manual focus mode, then change the AF frame setting. Using the Manual Focus in Combination with the Auto Focus Safety MF First, manual focus is used to roughly focus, then from that focus position the camera automatically focuses more accurately. This is effective when the contrast is too strong between the subject and background or when a subject is backlit.Aim the camera at the subject on which you wish to lock the exposure. Raise the flash. mode, press the button and select flash on. Adjust the exposure compensation to a negative value to avoid making the subject too bright in night shots or when shot against a dark background. The camera divides images into several zones for metering.

Getting Started p. 9

Ensure that you read the Safety Precautions (pp. 179 - 188).

Sometimes appears when This is a normal occurrence in devices shooting a bright subject, containing CCDs and does not such as the sun or other. If reformatting does not work, the memory card logic circuits may be damaged. Consult the nearest Canon Customer Support Help Desk. SD memory card or SDHC Slide the write protect tab upward memory card is write p. Light from the flash has This is a phenomenon that occurs reflected off dust particles with digital cameras and does not or insects in the air. This is constitute a malfunction.Memory card was Use a memory card formatted in your formatted in another camera p. 156. device. Lens will not retract.You attempted to play Computer images that cannot be back images shot with played back may play back if they are another camera or images added to the camera using the edited with a computer.Wipe the terminals well with a dry cloth before use. Reload the batteries several times. If using Canon AAsize NiMH batteries As the batteries have not Their charging performance should been used for over a year,. Replace both batteries immediately with unused AAsize alkaline batteries or fully charged Canon AAsize NiMH batteries. Also refer to Battery p. 185. No image. No images recorded on memory card. In addition, sound cannot be played back. Cannot modify image You attempted to resize or perform red eye correction on a movie or an image recorded with another camera. If this message continues to display, contact your Canon Customer Support Help Desk as there may be a problem with the lens. Always ensure that the camera is operated correctly. The safety precautions noted on the following pages are intended to instruct you in the safe and correct operation of the camera and its accessories to prevent injuries or damage to yourself, other persons and equipment. Do not use substances containing alcohol, benzine, thinners or other flammable substances to clean or maintain the equipment.

The batteries should not be immersed in water or sea water. Do not attempt to disassemble, alter or

apply heat to the batteries. When recharging the Canon AAsize NiMH batteries, use only a specified battery charger. The compact power adapter is designed for exclusive use with this equipment. Be careful not to bump or strongly push the end of the lens. The abovementioned could lead to injury or damage the equipment. Be careful not to cover the flash with your fingers or clothing when shooting. The flash may be damaged and emit smoke or noise. The resulting heat buildup could damage the flash. Camera operating time may shorten at low temperatures when alkaline batteries are used. The partially used batteries may leak. Do not install the batteries with their terminals reversed. Do not mix batteries of different types or from different manufacturers. Before installing the batteries, wipe the battery terminals well with a dry cloth. Formatting or erasing the data on a memory card merely changes the file management information on the memory card and does not ensure that its contents are completely deleted. When disposing of a memory card, take precautions, such as physically destroying the memory card, to prevent personal information leaks. Do not mix batteries with different purchase dates or different charge states. When recharging batteries, always recharge both of them at the same time. If you are purchasing new batteries, look for Canon AAsize NiMH batteries. Leaving batteries in the camera or charger may result in damage from battery leakage. When not in use, remove the batteries from the camera or charger and store them in a Downloaded from ManualsCamera.com Manuals. Use the following procedures to affix the camera and HighPower Flash to the supporting bracket. The HighPower Flash may not fire outdoors in daylight or when there are no reflective items. For continuous shooting, although the flash fires for the first shot, it does not fire for subsequent shots.
