Everyday crypto transactions: Coffee shops, restaurants, retailers

On Oct. 13, Bloomberg reported that China Renaissance Holdings Ltd., an investment bank based in Beijing, was in talks to raise about \$600 million to form a digital-asset treasury (DAT) in the US to accumulate BNB.

Bitcoin was recently trading at \$111,285, according to cryptocurrency markets data provider CoinGecko, after rising 2% over the past 24 hours. BTC is down more

than 10% after reaching an all-time high of \$124,285 last month.

The Average Directional Index, or ADX, sits at 33, well above the critical 25 threshold that confirms a strong trending market. Think of ADX as your “trend strength meter”—it doesn’t care about direction, just whether a real trend exists. Below 20, you’re in choppy waters where false breakouts are common. Above 25, you’ve got momentum. At 33, BNB is firmly in trending territory, meaning institutions and retail are moving in the same direction, creating sustained buying pressure that can carry prices significantly higher.

Even convenience stores are in it. Sheetz accepts Bitcoin, Ether and a handful of other coins at checkout. And if you’re more of an XRP loyalist, directories like Cryptwerk point you to smaller eateries happy to turn tokens into tacos or burgers.
