The innovation of the Ethereum platform lies in that it is not only a cryptocurrency but also a decentralized computing platform. Ethereum supports the development and execution of smart contracts, providing a runtime environment for decentralized applications (DApps). The emergence of Ethereum has greatly expanded the application scope of blockchain technology, giving birth to numerous innovative projects. In recent years, the Ethereum network has also been continuously upgraded and improved, such as the launch of Ethereum 2.0, which aims to solve the problems of network congestion and high energy consumption and improve the scalability of the system.

FalconX and 21Shares did not immediately respond to Decrypt's request for further comment.
