In this scenario, BNB would trade sideways for weeks before attempting another leg higher. The conservative year-end target becomes \$900-1000 rather than \$2,000—still excellent 200% yearly returns.

A key technical signal to watch is the 200-day exponential moving average (EMAs), which BTC has held for nearly six months. In the previous cycle, it maintained this trend from October 2024 to March 2024 before briefly losing it during consolidation. This time, the trendline has held from April to October 2025, with the price possibly losing the trendline in the coming days.
