hallucinate, and even provide dangerous answers based on flawed sources.

Tokyo Whale stops selling at around 144,000 BTC

How to read: A decline in volume on the right shoulder signals weakening momentum. A price break below the neckline confirms a bearish reversal, while a break above it confirms a bullish inverse. Measure the distance from the head to the neckline, then project that distance from the breakout point to estimate the target move.

Price pushes through a well-watched level on weak or average volume, shows little follow-through, and the next candle closes back inside the prior range.
