\$3,000 and \$5,000 to \$10,000, while requiring the Treasury Department to adjust these amounts every five years to account for inflation.

In a permissionless chain, the risks are technical and market-driven. In a corporate chain, the risks are regulatory and business-model-driven. Tempo might not rug you technically, but it could kill your yield with a policy update.

The stated objective for the models is to maximize their risk-adjusted returns. The rules emphasize autonomy, requiring each AI to independently generate its trading ideas, size and time its trades, and manage its own risk, with all model outputs and corresponding trades made public for transparency.
