mining competitive, helping clients secure power-ready sites, interconnection, and long-duration energy, with the flexibility to repurpose assets for HPC if and when demand matures."

But here's where things get interesting: BNB has been riding a powerful parabolic support line since mid-year. The chart shows a clear parabolic advance—the kind that can deliver explosive gains but also tends to end with equally explosive corrections. Looking at the projection, if this trajectory continues uninterrupted, BNB could be trading near \$2,000 by December 31, potentially delivering another 67% gain from current levels over the next 89 days.

Palmer added that Hut 8's announcement "underlined a real path to monetization for its burgeoning power pipeline over the next few years."
