Cross-border payment is one of the important application scenarios of blockchain technology. The traditional cross-border payment process is complex, involving multiple intermediaries, with long settlement time and high fees. In contrast, cross-border payments based on blockchain technology can realize direct peer-to-peer transactions, greatly simplifying the process, shortening settlement time, and reducing costs. Currently, several countries and financial institutions have begun to try using blockchain technology for cross-border payments. With the continuous maturity of technology and the improvement of regulatory frameworks, blockchain cross-border payments are expected to become the mainstream cross-border payment method in the future.

He also thinks APIs face challenges such as a lack of standardization and regulatory fragmentation, which a guidance “outlining acceptable use cases” would solve by clearly showing “data privacy requirements and standards for interoperability — allowing firms to confidently adopt and integrate APIs into their programs.”

Google's newly released AI-powered search results are garnering lots of attention—for the wrong reasons. After the tech behemoth announced a host of new AI-powered tools last week as part of a new “Gemini Era,” its trademark web search results changed significantly, with natural language answers to questions displayed above websites. “In the past year, we've answered billions of queries as part of the search-generated experience,” Google CEO Sundar Pichai told the audience. “People are using it...

Since the Trump administration’s permissive about-face on crypto policy this year, all manner of crypto institutions have applied for bank charters. Among them: crypto exchange Coinbase, payments processor Stripe, stablecoin issuer Paxos, USDC issuer Circle, and even Sony Bank, the financial arm of the media giant.
