Etherscan is a blockchain explorer designed for the Ethereum ecosystem. It's widely used by individuals, developers and institutions to verify transactions, monitor smart contracts and analyze token activity. Its reliability and extensive onchain data make it one of the most trusted tools for tracking Ethereum network activity.

Details of the deal were shared with Decrypt under embargo until Wednesday morning in New York, but were first reported by The Wall Street Journal, hours before the announcement was supposed to lift. Specific terms of the deal remain undisclosed.
