Chart patterns are shapes formed by price movements that help traders anticipate future market trends. These patterns fall into two main categories: reversal patterns, which signal that a current trend may change direction, and continuation patterns, which suggest the trend will likely resume after a brief pause. They stem from market psychology, where emotions like fear, greed and uncertainty drive collective trading behavior and create recognizable shapes on charts.

California state pension fund CalPERS recorded mixed reactions from board candidates on crypto investments during Wednesday's forum, despite the system holding shares in Bitcoin treasury company Strategy, previously known as MicroStrategy.

People have always looked to frontiers for freedom. That is because societies are, fundamentally, structures that organize violence to contain the desires of individuals in favor of the priorities of those in power. Generally, this has at least some pro-social qualities: Police have a privileged role as monopolists of violence so that we can buy deodorant at Walgreens without ringing a bell for an attendant. But that does not change what it is.

The repayment deadline was extended by a year to give creditors more time to complete claim procedures. With about \$3.9 billion in Bitcoin still in Mt. Gox-linked wallets, this Halloween may again spark concerns about possible sell pressure.

Ethereum could eventually surpass Bitcoin's market share in a similar manner to how US equities overtook gold 54 years ago, when the US abandoned the gold standard, according to BitMine chair Tom Lee.
