The company also claims the stock tokens offer 24-hour market access, no hidden fees beyond a 0.1% FX charge and the ability to start investing with just 1 euro (\$1.17).

Without real demand, any breakout attempt might lack the strength required to push ETH above key levels.

Mitchnick told Bloomberg that many early adopters now prefer the convenience of managing their holdings through established financial institutions while retaining exposure to Bitcoin's price movements.

Crypto trades 24/7, with sharp moves as likely on a Sunday night as on a Tuesday morning. In such a continuous market, trying to “pick your moment” is mostly guesswork, which is why many investors prefer a rule that removes the need for perfect timing.

Triangle patterns form when price movements create converging trendlines, resulting in a triangular shape. The three main types are ascending (bullish), descending (bearish) and symmetrical (neutral).

"In practical terms, this means HIVE is scaling production of Bitcoin much like a growth business scales output of a core product," he wrote. "Each incremental exahash increases daily production and revenue potential, while our HPC division provides a complementary revenue stream that grows with demand for compute power. "
