The room was a perfect forest of potential clues, jam-packed with gadgets and hardware that might have some
bearing on the case, if only Alvar knew enough about experimental robotics. Obviously, many of their systems had to be new-construction, but the truth is, that probably at least eighty-five percent of the design was based on existing hardware. Which meant Technodyne would be able to get a direct look at the latest and best Manty war-fighting

So, metal detector, inspection by the bored security team with their huge coffee cups, computer turned on, hardware and software check by experts, sniff-over by Clyde the morning

But the seconds of inexplicable survival stretched on into minutes while Hoveler kept trying very cleverly and subtly to inflict damage, controlled but irreversible, upon the thinking hardware. Michael knew

Here are some tips and techniques to get you started plusan explanation of some of the rules and conventions followed by crossword constructors and
editors. Select the Right PuzzlesThe first step to successful solving is to pick the right puzzles. Not all crosswords are equally difficult, and some puzzles requirespecialized knowledge such as pop culture, music, movies, or hipster slang. Crosswords also vary by constructor some constructors will have
lots of punny clues, others will require a lot ofknowledge of trivia, while still others might have clues that are very definitional so its really helpful to solve a puzzle in a book before you buy it. The GridOver the years, crossword grids have developed some standard conventions. Of course there are always exceptions to any rule, these are a few of the
requirements: The black blocks that signify the starts and ends of words must have rotational symmetry, meaning that they keep the same pattern when rotated 180 degrees All words in the grid which encourages a
more wide open puzzle with longer wordsSimilarly, many editors have a maximum word count which also necessitates grid designs, some of which are quite aesthetically pleasing. A common alternative to the block-style
grid is the bar-style grid. The same requirements apply, but in these grids, the words are separated by thick bars instead of solid blocks. This means that every square in the grid will be filled by a letter and that the entry words look squished together. One advantage to this style, is that none of the grid space is taken up by the blocks which can allow
for more content. Either style of puzzle will be solved in the same manner; the only difference is the visual appearance. Start with What You KnowYou dont need to start with the first clue.
