 codes One Piece, one of the most popular anime shows, was a great inspiration for this Roblox game. In One Piece, the infamous Grand Line, a chain of bizarre islands spanning the entire world, is divided into several segments, each progressively weirder and more hostile than the last. Pirates who enter the further half of the Grand Line often refer to
the front half as "Paradise" because of how accommodating it seems by comparison. Still, if you wanna become the King of the Pirates in Blox Fruits, you're gonna need to travel the entire world. Here are all of the islands and locations, plus their level requirements, in Blox Fruits is broken up into three sea sections, loosely
based on the progression of One Piece's story. This is also why the world is constantly evolving and adding new islands; because One Piece's story isn't over yet, and God knows when it will be. The quests on each of these islands require gradually escalating levels, with the current highest level requirement being 2275. Let's not get ahead of
ourselves, though. Here's the list of islands and level requirements, divided up by seas. Image via Gamer Robot/Roblox Starter Pirate Island: Level 30-60 Desert: Level 60-90 Middle Island: Level 100 Frozen Village: Level 90-120 Marine Fortress: Level 120-150 Skylands

everyone laugh if you catch my drift. Blox Fruits is one of the most popular Roblox games on the platform, but even it can get old after a while if you've played it often enough.
