How to Minimize SAT Registration and reporting costs can add up pretty quickly if you're applying to a lot of schools. You can avoid a lot of these fees if you plan ahead. Planning ahead can save you hundreds of dollars; your piggy bank will thank you Take the SAT last minute, or if you procrastinate in sending official score reports. Although this is unavoidable in certain circumstances, you'll save your set earlier rather than later. It takes about two weeks for your scores to be posted after you take your SAT. You should budget another two weeks for your scores to be contracted after you take your scores to be posted after you take you take yo receive your score reports. In order to avoid rush fees, try to schedule your last SAT no later than four weeks before your scores need to be in. Register Early If you miss the normal deadline and have to register late, you'll end up increasing your total registration costs by about 50%. Registering months in advance won't just save you money—it will also ensure you get the test date you want before all the seats are booked. Having a hard test deadline in mind can also jumpstart your motivation to study; you'll be better able to budget your time. Take Advantage of Free Score Reports You can send up to four score reports for free if you specify the schools you'd like to send your scores to early enough. List the four schools as early as registration, and as late as nine days after the published test date. This will save you up to \$56. Apply for a Fee Waiver if You're Eligible Low-income families may find these SAT costs to be especially daunting. In an effort to mitigate this financial burden, the College Board offers fee waivers to certain students. You may qualify if you meet any of the following SAT fee waiver requirements: You're enrolled in or eligible to participate in the National School Lunch Program (NSLP) Your family receives public assistance You're enrolled in a federal, state, or local program for low income students (e.g. Upward Bound) You live in subsidized housing, foster care, or are homeless You are a ward of the state or an orphan With a fee waiver, you get free test registration and free score reports. You have to apply for a fee waiver through your school counselor; since this can take time, make sure to apply for a fee waiver well in advance of the test dates you'd like to register for. Development of the Bastille, 14 July 1789, an iconic event of the French Revolution in Europe. place in the late 18th century. The 18th century lasted from 1 January 1701 (represented by the Roman numerals MDCCI) to 31 December 1800 (MDCCC). During the 18th century, elements of Enlightenment thinking culminated in the Atlantic Revolutions. Revolutions. Revolutions began to challenge the legitimacy of monarchical and aristocratic power structures The Industrial Revolution began mid-century, leading to radical changes in human society and the environment. The European colonization of the Age of Sail. During the century, slave trading expanded across the shores of the Atlantic Ocean, while declining in Russia[1] and China.[2] Western historians have occasionally defined the 18th century otherwise for the purposes of their work. For example, the "short" 18th century may be defined as 1715-1789, denoting the period of time between the death of Louis XIV of France and the start of the French Revolution, with an emphasis on directly interconnected events.[3][4] To historians who expand the century to include larger historical movements, the "long" 18th century[5] may run from the Glorious Revolution of 1688 to the Battle of Waterloo in 1815[6] or even later.[7] France was the sole world superpower from 1659, after it defeated Spain, until 1815, when it was defeated by Britain and its coalitions following the Napoleonic Wars. In Europe, philosophers ushered in the Age of Enlightenment. This period coincided with the French Revolution of 1789, and was later compromised by the excesses of the Reign of Terror. At first, many monarchies of Europe embraced Enlightenment ideals, but in the wake of the French Revolution they feared loss of power and formed broad coalitions to oppose the French Revolutionary Wars. Various conflicts throughout the century, including the War of the Spanish Succession and the Seven Years' War, saw Great Britain triumph over its rivals to become the preeminent power in Europe. However, Britain's attempts to exert its authority over the Thirteen Colonies became a catalyst for the American Revolution. The 18th century also marked the end of the Polish-Lithuanian Commonwealth as an independent state. Its semi-democratic government system was not robust enough to prevent partition by the neighboring states of Austria, Prussia, and Russia. In West Asia, Nader Shah led Persia in successful military campaigns. The Ottoman Empire experienced a period of peace, taking no part in Europe's military improvements during the Seven Years' War. The Ottoman military consequently lagged behind and suffered several defeats against Russia in the second half of the century. In South Asia, the death of Mughal emperor Aurangzeb was followed by the expansion of the Maratha Confederacy and an increasing level of European influence and control in the region. In 1739, Persian emperor Nader Shah invaded and plundered Delhi, the capital of the Mughal Empire. Later, his general Ahmad Shah Durrani scored another victory against the Marathas, the then dominant power in India, in the Third Battle of Panipat in 1761.[8] By the middle of the century, the Anglo-Mysore Wars against Tipu Sultan and his father Hyder Ali, led to Company rule over the south.[10][11] In East Asia, the century was marked by the High Qing era, a period characterized by significant cultural and territorial expansion. This period also experienced relative peace and prosperity, allowing for societal growth, increasing literacy rates, flourishing trade, and consolidating imperial power across the vast Qing dynasty's territories. Conversely, the continual seclusion policy of the Tokugawa shogunate also brought a peaceful era called Pax Tokugawa and experienced a flourishment of the arts as well as scientific knowledge and advancements, which were introduced to Japan through the Dutch port of Nagasaki. In Southeast Asia, the Konbaung-Ayutthaya Wars and the Tây Son Wars broke out while the Dutch East India Company established increasing levels of control over the Mataram Sultanate. In Africa, the Ethiopian Empire underwent the Zemene Mesafint, a period when the country was ruled by a class of regional noblemen and the emperor was merely a figurehead. The Atlantic slave trade also saw the continuec involvement of states such as the Oyo Empire. In Oceania, the European colonization of Australia and New Zealand began during the late half of the century. In the Americas, the United States declared its independence from Great Britain. In 1776, Thomas Jefferson wrote the Declaration of Independence. In 1789, George Washington was inaugurated as the first president. Benjamin Franklin traveled to Europe where he was hailed as an inventor. Examples of his inventions include the lightning rod and bifocal glasses. Túpac Amaru II led an uprising that sought to end Spanish colonial rule in Peru. For a chronological guide, see Timeline of the 18th century.
