The length of one side of a parallelogram is 3 more than twice the length of theadjacent side. The perimeter of the parallelogram is 30 cm. Find the lengths ofthe two adjacent sides of the parallelogram. 4 cm and 11 cm26. Reasoning A classmate draws a parallelogram for which one side is twiceas long as the other. If one side is 26 units, what are all the possiblelengths of the perimeter? 78 units or 156 unitsPrentice Hall Foundations Geometry Teaching ResourcesCopyright by Pearson Education, Inc., or its affiliates.
