If you want to manually reset the service light on your 2017 Citroen Jumper, you must follow the procedure described in this new guide. First of all, reach the driver's seat inside the vehicle and insert the key and turn on the instrument panel. As soon as the panel is on, hold down the accelerator pedal and simultaneously press the brake pedal six times in a row. Then continue to hold down the accelerator pedal for about a minute to complete the service light reset procedure. Posted on 3 January 2025 by SegliAuto Weiß zufällig jemand ob der Jumper irgendwann in den Notlauf geht bzw nur noch reduzierte Leistung zur Verfügung steht, wenn man den Service nicht zurück stellt? Ich meine irgendwo mal gelesen zu haben, dass dies passiert, wenn man keine Ölwechsel macht. In this tutorial we can see how to reset the service in the Citroen Jumper van, an extremely simple and quick operation, to be carried out only once all the scheduled maintenance work has been completed. First of all, let's go inside the cabin, then insert the key but leave it in the first position. Next, press the button depicting a wrench on the dashboard, simultaneously turn on the instrument panel and keep the button pressed for the entire duration of the countdown displayed. Finally, restart the instrument panel.
