Skip to content SBACVMA Directions Call Us Now Our clinical team provide comprehensive vascular and vein care. From conditions affecting the abdomen, kidneys, legs, to the neck, we take an holistic approach to address peripheral vascular issues. Learn More Your feedback is important to us and improves our quality of care. Read Our Reviews Receba dicas exclusivas de saúde e bem-estar no nosso grupo Viver com saúde é uma busca constante, e entender os sinais que nosso corpo envia é fundamental para garantir qualidade de vida. Neste artigo, vamos abordar a Doença Arterial Obstrutiva Periférica (DAOP), uma condição que afeta a circulação sanguínea e pode gerar grande impacto no dia a dia. No Brasil, estima-se que a DAOP atinja cerca de 3% da população, enquanto os dados mundiais apontam para uma prevalência de 202 milhões de casos. Imagine só: dores nas pernas que limitam suas atividades, dificuldade para caminhar e até mesmo o risco de complicações sérias. A DAOP é um alerta que não podemos ignorar! Mas afinal, o que é a DAOP e como ela impacta a sua saúde? Continue a leitura e descubra como podemos cuidar juntos da sua saúde vascular. A Doença Arterial Obstrutiva Periférica, como o próprio nome sugere, é caracterizada pelo estreitamento ou obstrução das artérias, vasos sanguíneos responsáveis por transportar o sangue rico em oxigênio do coração para outras partes do corpo. Diferente do que muitos pensam, ela não afeta apenas o coração, mas principalmente as artérias que irrigam os membros inferiores, como um sistema de canais ficam obstruídos, a irrigação sanguínea é comprometida, o que pode levar a uma série de sintomas e complicações. Muitas vezes, ela se manifesta de forma silenciosa, sem sintomas aparentes. No entanto, à medida que a condição avança, alguns sinais podem surgir, como: Claudicação intermitente: dor, cãibra ou sensação de peso nas pernas durante a caminhada ou exercícios físicos, que melhora com o repouso. Essa dor é um sinal clássico da DAOP e ocorre devido à falta de oxigenação adequada nos músculos durante o esforço. Dor nas pernas em repouso; em casos mais graves, a dor pode apresentar-se fria, pálida ou azulada, além de apresentar feridas que demoram a cicatrizar, unhas quebradiças e queda de pelos. Sensação de formigamento ou dormência: a falta de circulação sanguínea adequada pode causar dormência, formigamento ou sensação de "alfinetes e agulhas" nas pernas e pés. É importante destacar que a intensidade dos sintomas varia de pessoa para pessoa, e a ausência de sintomas não significa que a doença não esteja presente. Por isso, a consulta médica regular é fundamental para diagnóstico precoce e tratamento adequado. É uma condição séria que, se não tratada adequadamente, pode levar a complicações graves, como: Isquemia crítica dos membros: redução grave do fluxo sanguíneo para as pernas e pés, causando dor intensa, feridas e, em casos extremos, gangrena, que pode levar à amputação. Ataque cardíaco e Acidente Vascular Cerebral (AVC): pessoas com DAOP apresentam risco aumentado de desenvolver doenças cardiovasculares, como infarto e AVC, devido à presença de placas de gordura nas artérias (aterosclerose). Aneurisma: a DAOP aumenta o risco de desenvolvimento de aneurismas, que são dilatações anormais nas paredes das artérias, podendo se romper e causar hemorragia interna. A boa notícia é que a pode ser prevenida com a adoção de hábitos de vida saudáveis, como: Pare de fumar: o tabagismo é um dos principais fatores de risco para DAOP, pois a nicotina presente no cigarro danifica as paredes das artérias e acelera o processo de aterosclerose. Mantenha uma dieta equilibrada: adote uma alimentação rica em frutas, verduras, legumes e proteínas magras, evitando o consumo excessivo de gorduras saturadas, trans e colesterol. Pratique exercícios físicos regularmente: a prática regular de atividades físicas, como caminhadas, natação e ciclismo, ajuda a melhorar a circulação sanguínea, fortalecer o coração e controlar a pressão arterial: a hipertensão arterial: a arterial sobrecarrega o coração e aumenta o risco de desenvolvimento de DAOP. Mantenha um peso saudável: o excesso de peso aumenta o risco de desenvolver DAOP e outras doenças cardiovasculares. Medicamentos: seu médico poderá prescrever medicamentos para controlar o diabetes, aliviar a dor e prevenir a formação de coágulos sanguíneos. Angioplastia: procedimento minimamente invasivo que utiliza um cateter com um pequeno balão na ponta para desobstruir a artéria. Cirurgia de revascularização: procedimento cirúrgico para criar uma nova via de fluxo sanguíneo, desviando o sangue da artéria obstruída. Exercícios físicos supervisionados: programas de exercícios físicos supervisionados por profissionais de saúde podem ajudar a melhorar a capacidade de caminhar e reduzir a dor. Cuidado scom os pés, mantendo-os limpos e secos, usando calçados confortáveis e procurando atendimento médico ao primeiro sinal de feridas ou lesões. 1. "Doutora, sinto dor nas pernas ao caminhar, mas ela desaparece quando paro para descansar. Pode ser DAOP?" É possível. A dor nas pernas durante a caminhada, conhecida como claudicação intermitente, é um sintoma clássico da DAOP. No entanto, apenas um médico especialista pode realizar o diagnóstico preciso após avaliar seus sintomas, histórico médico e realizar exames complementares. 2. "Fui diagnosticado com DAOP. A partir de agora, não posso mais fazer exercícios físicos?" Pelo contrário! A prática regular de exercícios físicos?" Pelo contrário!" Pelo contrário!" Pelo contrário!" Pelo contrário!" Pelo contrári o tipo de exercício mais adequado e a intensidade ideal para o seu caso. 3. "A Doença Arterial Obstrutiva Periférica tem cura?" Embora não tenha cura, a DAOP pode ser controlada com tratamento adequado e mudanças no estilo de vida. O objetivo do tratamento é aliviar os sintomas, evitar a progressão da doença e prevenir complicações. 4. "Quais são os principais fatores de risco para DAOP?" Os principais fatores de risco para DAOP?" Os principais fatores de risco para DAOP?" Se você apresentar sintomas como dor nas pernas ao caminhar, feridas que demoram a cicatrizar, alterações na cor da pele das pernas e pés, procure um médico especialista para avaliação. O diagnóstico precoce é fundamental para iniciar o tratamento e evitar complicações. A Dra. Elisa Biesek, especialista em Saúde da Família, está comprometida em oferecer um atendimento humanizado e individualizado para cada paciente, buscando entender suas necessidades e oferecer o melhor tratamento para a Doença Arterial Obstrutiva Periférica. Com experiência e expertise, a Dra. Elisa Biesek está pronta para auxiliá-lo no cuidado com a saúde vascular, desde o diagnóstico até o tratamento e acompanhamento. Cuidar da sua saúde vascular é essencial para uma vida mais leve e ativa. A Doença Arterial Obstrutiva Periférica é uma condição séria, mas com tratamento adequado e mudanças no estilo de vida, é possível controlar a doença e ter mais qualidade de vida. Não espere os sintomas se agravarem, agende uma consulta com a Dra. Elisa Biesek e dê o primeiro passo para uma vida mais saudável! Tudo que você precisa saber sobre a Doença Arterial Obstrutiva Periférica: epidemiologia, fisiopatologia, sintomas, diagnóstico e mais! Algumas Universidades durante o rodízio de Cirurgia Nascular, e como consequência, muitos alunos acabam tendo pouca vivência nos assuntos da área. Para isso, nós da LIVASC-CG, produzimos esse breve material a fim de aprimorar seu conhecimento sobre a DAOP, além de despertar o interesse pela área de atuação e apresentar seus impactos na vida do paciente, bem como principal etiologia a doença aterosclerótica. Essa é responsável por levar à obstrução da artéria periférica. Pode se apresentar de forma assintomática ou manifestar uma variedade de sintomas e sinais indicativos de isquemia das extremidades, sendo a principal causa de morte no mundo ocidental, devido ao alto risco de morbimortalidade cardiovascular associado. É caracterizada por depósito de gordura, cálcio e outros elementos na parede das artérias, reduzindo seu calibre e trazendo um déficit sanguíneo aos tecidos irrigados por elas. A presença de uma úlcera nas extremidades é um dos sinais clínicos mais óbvios. Entretando, outras manifestações como claudicação intermitente e dor em repouso devem ser ativamente procuradas e diferenciadas das condições não ateroscleróticas e não vasculares, para garantir quando necessário, o encaminhamente, as complicações levam à perda de membros podem ser minimizadas. Figura 1: Doença Arterial Obstrutiva Periférica (DAOP) - SBACV. Fonte: Diversos processos patológicos levam à obstrução arterial, provocando sintomas de insuficiência arterial devido à redução do fluxo sanguíneo. O acúmulo subintimal de material lipídico e fibroso (ou seja, placa) estreita o lúmen do vaso, que pode cursar com trombose ou rompimento da placa aterosclerótica, causando oclusão dos vasos a jusante. Vários fatores contribuem para a patogênese da aterosclerose, incluindo: disfunção e gravidade da aorta ou artérias dos membros inferiores dependem da localização e gravidade da doença. Em qualquer segmento arterial (aorto-ilíaco, femoropoplíteo, tibial), a placa tende a ocorrer proximamente ou no segmento médio (por exemplo, bifurcação proximal). A doença aterosclerótica segue padrões anatômicos que também influenciam a história natural e a progressão da doença. Pacientes com diabetes ou com doença renal em estágic terminal geralmente apresentam doença mais distal. A aterosclerose na aorta pode estar associada ao aneurismática é considerada distinta da aterosclerose, no entanto, as manifestações clínicas podem se sobrepor. Epidemiologia e Fatores de risco A prevalência mundial de DAOP dos membros inferiores está entre 3 e 12%. Em 2010, 202 milhões de pessoas em todo o mundo estavam vivendo com essa enfermidade. Na Europa e América do Norte, estima-se que 27 milhões de indivíduos com DAOP (70%)
vive em regiões de baixa / média renda do mundo, incluindo 55 milhões de indivíduos no sudeste da Ásia e 46 milhões na região do Pacífico Ocidental. O número de indivíduos com DAOP aumentou 29% nas regiões de alta renda de 2000 a 2010 em comparação com a década anterior. Fatores de risco da Doença arterial obstrutiva periférica Os fatores de risco que favorecem o desenvolvimento da DAOP predominaram os marcadores associados à inflamação e ao tabagismo, enquanto o colesterol total e a massa corporal foram menos importantes. Os fatores de risco mais frequentemente avaliados nas publicações foram: hipertensão diabetes tabagismo histórico de doença cardiovascular e idade. É válido ressaltar que embora p diabetes mellitus seja um importante fator de risco, não é a causa mais comum de DAOP. Quadro clinico Pacientes com DAOP geralmente são assintomáticos. No entanto, se o suprimento sanguíneo falhar em atender aos requisitos metabólicos contínuos, como consequência do estreitamento arterial, ocorrerão sintomas cuja gravidade depende do grau de estreitamento arterial, número de artérias afetadas e nível de atividade (ou seja, claudicação intermitente) dor atípica Ou dor em repouso ou feridas não cicatrizadas, ulceração ou gangrena. Relação dos sintomas Assintomático - 20 a 50% Dor atípica nas pernas - 40 a 50% Claudicação clássica - 10 a 35% Membro ameaçado - 1 a 2%. como assintomáticos ou com claudicação intermitente leve a moderada é relativamente benigna. Naqueles com claudicação intermitente, 70 a 80% apresentam claudicação intermitente, 70 a 80% desenvolvem claudicação intermitente, 70 a 80% apresentam claudicação estável. membros é significativamente pior em pacientes com: aterosclerose de início precoce pacientes com diabetes ou doença renal termina naqueles que continuam fumando. Classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de DAOP podem ser classificação de Fontaine e Rutheford De acordo com os sinais e sintomas, os portadores de ADAOP podem ser classificação de Rutheford De acordo com os sintemas, os portadores de ADAOP pod existentes, duas são as mais utilizadas. A classificação de Fontaine que separa os pacientes em quatro estágios e a classificação de Rutherford, que aloca os pacientes em sete categorias, incluindo os assintomáticos. Tabela 1: Classificação de Rutherford, que aloca os pacientes em quatro estágios e a classificação de Rutherford, que aloca os pacientes em sete categorias, incluindo os assintomáticos. arterial obstrutiva periférica (DAOP) também inclui pacientes com lesões arteriais que se traduzem apenas por alteração em exames não invasivos, antes mesmo do aparecimento de qualquer sintoma detectável pelo exame clínico. Assim, consensos recentes definem como DAOP alteração em exames não invasivos, antes mesmo do aparecimento de qualquer sintoma detectável pelo exame clínico. braco (ITB) medido com Doppler ultrassom. Um indivíduo é considerado portador de DAOP, especialmente a aterosclerose obliterante periférica (AOP), acompanha alterações em outros territórios vasculares. É ainda considerada um marcador de morbidade e mortalidade cardiovascular. Considerando essa definição, cerca de metade dos pacientes com DAOP é assintomática. Diagnóstico clínico das doenças arteriais periféricas baseia-se na busca e na interpretação de sintomas e sinais. Eles podem podem aparecer no local de uma alteração arterial ou que surgem em decorrência de isquemia no território irrigado pela artéria lesada. É importante notar que, com boa anamnese, consegue-se chegar a um diagnóstico de doença arterial com mais de 90% de possibilidade de acerto, antes mesmo da realização do exame físico. Com a realização do exame físico, consegue-se aumentar esse índice diagnóstico e confirmar a localização e a intensidade da doenca na maioria dos casos. Exames complementares A angiotomografia baseada em cateter é geralmente reservada para pacientes nos quais persistem incertezas após testes não invasivos ou nos quais a intervenção é antecipada. Tratamento O tratamento de pacientes com DAOP nos membros inferiores visa aliviar os sintomas e diminuir o risco de progressão e complicações de doenças cardiovasculares. Pacientes com DAOP apresentam uma ampla gama de sintomas e efeitos associados à função diária. O tratamento da DAOP sintomática dos membros inferiores baseia-se em: uma avaliação cuidadosa dos fatores de risco e comorbidades médicas, conformidade com tratamentos farmacológicos cuidados de acompanhamento e nos valores e objetivos subjetivos do paciente. Pacientes com dor ou ulceração isquêmica podem necessitar necessariamente de intervenção precoce para recuperação dos membros. O manejo médico envolve redução do fator de risco cardiovascular, modificação do estilo de vida e outras terapias farmacológicas, como estatinas e AAS para reduzir o risco de progressão da doença aterosclerótica. Com o manejo médico agressivo, pode ser possível a regressão de lesões ateroscleróticas não calcificadas. Exercícios regulares e redução de peso também são importantes. The French military intended to capture Vienna and force the Holy Roman Emperor to surrender. The French Army of the Rhine and Moselle, led by Jean-Baptiste Jourdan opposed the Austrian Army of the Upper Rhine in the south. At the Battle of Amberg on 24 August and the Battle of Würzburg on 3 September, Charles defeated Jourdan's northern army. During the winter the Austrians forced Moreau's army back to France. Despite Charles's success in the Rhineland, Austria lost the war when the French Army of Italy, commanded by Napoleon Bonaparte, advanced on Vienna, resulting in the Peace of Campo Formio. An 1835 illustration of power loom weaving, as part of the Industrial Revolution Millennia 2nd m Timelines 18th century 19th century 20th century 20th century 20th century 20th century 19th century 20th century 20th century 20th century 19th century 20th century 1801 (represented by the Roman numerals MDCCCI), and ended on 31 December 1900 (MCM). It was the 9th century of the 2nd millennium. It was characterized by vast social upheaval. Slavery was abolished in much of Europe and the Americas. The First Industrial Revolution, though it began in the late 18th century, expanded beyond its British homeland for the first time during the 19th century, particularly remaking the economies and societies of the Low Countries, France, the Rhineland, Northern Italy, and the Northeastern United States. A few decades later, the Second Industrial Revolution led to ever more massive urbanization and much higher levels of productivity, profit, and prosperity, a pattern that continued into the 20th century. Church, in response to the growing influence and power of modernism, secularism and materialism, formed the First Vatican Council in the late 19th century to deal with such problems and confirm certain Catholic doctrines as dogma. Religious missionaries were sent from the Americas and Europe to Asia, Africa and the Middle East. In the Middle East, it was an era of change and reform. The Islamic gunpowder empires fell into decline and European imperialism brought much of South Asia, Southeast Asia, and almost all of Africa under colonial rule. Reformers were opposed at every turn by conservatives who strove to maintain the centuries-old Islamic laws and social order.[1] The 19th century also saw the collapse of the large Spanish, Portuguese, French and Mughal empires, which paved the way for the growing influence of the British, French, German, Russian, Austro-Hungarian, Italian, and Japanese empires along with the United States. as the world superpower. Britain took France's status as the world superpower, the British and Russian empires expanded its territory to the Caucasus and Central Asia. The Ottoman Empire underwent a period of Westernization and reform known as the Tanzimat, vastly increasing its control over core territories in the Middle East. However, it remained in decline and became known as the sick man of Europe, losing territory in the Balkans and North Africa. The remaining powers in the Indian subcontinent, such as the Maratha and Sikh empires, suffered a massive decline, and their dissatisfaction with the British East India Company's rule led to the Indian Rebellion of 1857 and the company's dissolution. India was later ruled directly by the British Raj. During the post-Napoleonic era (after 1815), Britain enforced what became known as the Pax Britannica, which ushered in unprecedented globalization on a massive scale. Britain's overseas possessions grew rapidly in the first half of the century, especially with the expansion of vast territories in Canada, Australia, India, and in the last two decades of the century, the British controlled a fifth of the world's population. By the end of the century, Britain, France, Germany, and the United States had colonized almost all of Oceania. In East Asia, China under the Qing dynasty endured its century of humiliation by foreign powers that lasted until the first half of the 20th century were Jiroemon Kimura (1897-2013) and Nabi Tajima (1900-2018), both Japanese. Official portrait of Queen Victoria, 1859 The first electronics appeared in the 19th century, with the introduction of the electric relay in 1835, the telegraph and its Morse code protocol in 1837, the first telephone call in 1876,[2] and the first functional light bulb in 1878.[3] The 19th century was an era of rapidly accelerating scientific discovery and invention, with significant developments in the fields of mathematics, physics, chemistry, biology, electricity, and metallurgy that laid the groundwork for the technological advances of the 20th century.[4] The Industrial Revolution began in Great Britain and spread to continental Europe, North America, and Japan.[5] The Victorian era was notorious for the employment of young children in factories and mines, as well as strict social norms regarding modesty and gender roles.[6] Japan embarked on a program of rapid modernization following the Meiji Restoration, before defeating China, under the Pirst Sino-Japanese War. Advances in medicine and the understanding of human anatomy and disease prevention took place in the 19th century, and were partly responsible for rapidly accelerating population growth in the Western world. Europe's population doubled during the 19th century, from approximately 200 million to more than 400 million.[7] The introduction of railroads provided the first major advancement in land transportation for centuries, changing the way people lived and obtained goods, and fuelling major urbanization movements in countries across the globe. Numerous cities worldwide surpassed populations of a million or more during this century. London became the world's largest city and capital of the British Empire. Its population increased from 1 million in 1800 to 6.7 million a century later. The last remaining undiscovered landmasses of Earth, including vast expanses of interior Africa and Asia, were explored during this century, and with the exception of the extreme zones of the Arctic and Antarctic, accurate and detailed maps of the globe were available by the 1890s. Liberalism became the pre-eminent reform movement in Europe.[8] Arab slave traders and their captives along the Ruvuma River, 19th century Slavery was greatly reduced around the world. Following a successful slave revolt in Haiti, Britain and France stepped up the battle against the Barbary pirates and succeeded in stopping their enslavement of Europeans. The UK's Slavery Abolition Act 1833 charged the British, who did so in 1834. America's Thirteenth Amendment following their Civil War abolished slavery there in 1865, and in Brazil slavery was abolished in 1888 (see abolitionism). Similarly, serfdom was abolished in Russia in 1861. The 19th century was remarkable in the widespread formation of new settlement foundations which were particularly prevalent across North
America and Australia, with a significant proportion of the two continents' largest cities being founded at some point in the century. Chicago in the United States and Melbourne in Australia were non-existent in the earliest decades but grew to become the 2nd largest cities in the United States and British Empire respectively by the end of the century. In the 19th century, approximately 70 million people left Europe, with most migrating to the United States.[10] The 19th century also saw the rapid creation, development, and codification of many sports, particularly in Britain and the United States. Association football, rugby union, baseball, and many other sports were developed during the 19th century, while the British Empire facilitated the rapid spread of sports such as cricket to many different parts of the world. Also, women's fashion was a very sensitive topic during this time, as women showing their ankles was viewed to be scandalous. The boundaries set by the Congress of Vienna, 1815 It also marks the fall of the Ottoman rule of the Balkans which led to the creation of Serbia, Bulgaria, Montenegro, and Romania as a result of the second Russo-Turkish War, which in itself followed the great Crimean War. Map of the world from 1897. The British Empire (marked in pink) was the superpower of the 19th century. Industrial Revolution European imperialism British Regency, Victorian era (UK, British Empire) Bourbon Restoration, July Monarchy, French Second Republic, Second French Empire, French Third Republic (France) Risorgimento (Italy) Belle Époque (Europe) Edo period, Meiji period (Japan) Qing dynasty (Korea) Zulu Kingdom (South Africa) Tanzimat, First Constitutional Era (Ottoman Empire) Russian Empire Manifest destiny, Antebellum era, Reconstruction era, American frontier, Gilded Age (United States) Main article: Napoleonic Wars For a chronological guide, see Timeline of the Napoleonic Wars were a series of major conflicts from 1803 to 1815 pitting the French Empire and its allies led by Napoleon I, against a fluctuating array of European powers formed into various coalitions, financed and usually led by the United Kingdom. The wars stemmed from the unresolved disputes associated with the French Revolution, Napoleon Bonaparte gained power in France in 1799. In 1804, he crowned himself Emperor of the French. In 1805, the French victory over an Austrian-Russian army at the Battle of Austerlitz ended the War of the Treaty of Pressburg, the Holy Roman Empire was dissolved. Later efforts were less successful. In the Peninsular War, France unsuccessfully attempted to establish Joseph Bonaparte as King of Spain. In 1812, the French invasion of Russia had massive French casualties, and was a turning point in the War of the Sixth Coalition, Napoleon abdicated and was exiled to Elba. Later that year, he escaped exile and began the Hundred Days before finally being defeated at the Battle of Waterloo and exiled to Saint Helena, an island in the South Atlantic Ocean. After Napoleon's defeat, the Congress of Vienna was held to determine new national borders, with limited impact. Main article: Spanish American wars of independence The Chilean Declaration of Independence, 18 February 1818 Mexico and the majority of the countries in Central America and South America obtained independence, 18 February 1818 Mexico and the majority of the countries in Central America and South America and South America obtained independence from colonial overlords during the 19th century. In Mexican War of Independence was a decade-long conflict that ended in Mexican independence in 1821. Due to the Napoleonic Wars, the royal family of Portugal. The Federal Republic of Central America gained independence from Spain in 1821 and from Mexico in 1823. After several rebellions, by 1841 the federation had dissolved into the independent countries of Guatemala, El Salvador, Honduras, Nicaragua, and Costa Rica.[11] In 1830, the post-colonial nation of Gran Colombia dissolved and the nations of Colombia dissolved and the nations of Colombia dissolved and the post-colonial nation of Gran Colombia dissolved and the nations of Colombia dissolved and the nations of Colombia dissolved and the nation of Gran Colombia dissolved and article: Revolutions of 1848. The Revolutions of 1848. The revolutions of 1848. The Revolutions of 1848. The Revolutions of 1848. The revolutions of 1848. The first revolution began in January in Sicily.[clarification needed] Revolutions then spread across Europe after a separate revolution began in France in February. Over 50 countries were affected, but with no coordination or cooperation among their respective revolutionaries. According to Evans and von Strandmann (2000), some of the major contributing factors were widespread dissatisfaction with political leadership, demands for more participation in government and democracy, demands for freedom of the press, other demands for freedom of the War Politician and philanthropist William Wilberforce (1759-1833) was a leader of the movement to abolish the slave trade. The Atlantic slave trade was abolished in the United States in 1808, and by the end of the century, almost every government had banned slavery. The Slavery Abolition Act 1833 banned slavery throughout the British Empire, and the Lei Aurea abolished slavery in Brazil in 1888. Abolitionism in the United States continued until the end of the American Civil War. Frederick Douglass was an articulate orator and incisive antislavery writer, while Tubman worked with a network of antislavery activists and safe houses known as the Underground Railroad. The American Civil War took place from 1861 to 1865. Eleven southern states seceded from the United States, largely over concerns related to slavery. In 1863, President Abraham Lincoln issued the Emancipation Proclamation. Lincoln issued a preliminary[13] on September 22, 1862, warning that in all states still in rebellion (Confederacy) on January 1, 1863, he would declare their slaves "then, thenceforward, and forever free."[14] He did so.[15] The Thirteenth Amendment to the Constitution,[16] ratified in 1865, officially abolished slavery in the entire country. Five days after Robert E. Lee surrendered at Appomattox Courthouse, Virginia, Lincoln was assassinated by actor and Confederate sympathizer John Wilkes Booth. Main article: Decline and modernization of the Egyptian-Ottoman War (1831-1833)[17] In 1817, the Principality of Serbia became suzerain from the Ottoman Empire, and in 1867, it passed a constitution that defined its independence from the
Ottoman Empire. In 1830, Greece became the first country to break away from the Ottoman Empire. rule occurred. In 1831, The First Egyptian-Ottoman War (1831-1833) occurred, between the Ottoman Empire and Egypt brought about by Muhammad Ali Pasha's demand to the Sultan during the Sultan d Syria, advancing as far north as Kütahya.[18] In 1876, Bulgarians instigated the April Uprising against Ottoman rule. Following the Russo-Turkish War, the Treaty of Berlin recognized the formal independence of the Serbia, Montenegro, and Romania. Bulgaria became autonomous. Main article: Taiping Rebellion A scene of the Taiping Rebellion The Taiping Rebellion was the bloodiest conflict of the 19th century, leading to the deaths of around 20-30 million people. Its leader, Hong Xiuquan, declared himself the younger brother of Jesus Christ and developed a new Chinese religion known as the God Worshipping Society. After proclaiming the establishment of the Taiping Heavenly Kingdom in 1851, the Taiping army conquered a large part of China, capturing Nanjing in 1853. In 1864, after the death of Hong Xiuquan, Qing forces recaptured Nanjing and ended the rebellion.[19] Main article: Meiji Restoration During the Edo period, Japan largely pursued an isolationist foreign policy. In 1853, United States Navy Commodore Matthew C. Perry threatened the Japanese capital Edo with gunships, demanding that they agree to open trade. This led to the opening of trade relations between Japanese government under Emperor Meiji had eliminated the daimyo system and established a strong central government. Further reforms included the abolition of the samurai class, rapid industrialization and modernization of government, closely following European models.[20] Main articles: Western imperialism in Asia and Scramble for Africa Arrival of Marshal Randon in Algiers, French Algeria in 1857 The Maratha Confederacy and the East India Company sign the Treaty of Bassein in 1802. 1803: United States more than doubles in size when it buys out France's territorial claims in North America via the Louisiana Purchase. This begins the U.S.'s westward expansion to the Pacific, referred to as its Manifest Destiny, which involves annexing and conquering land from Mexico, Britain, and Native Americans. 1817 - 1819: British Empire annexed the Maratha Confederacy after the Third Anglo-Maratha War. 1823 - 1887: British Empire is defeated in the Second Anglo-Sikh War. Therefore, the entire Indian subcontinent is under British control 1862: France gained its first foothold in Southeast Asia and in 1863 annexed Cambodia. 1867: United States purchased Alaska from Russia. Comparison of Africa in the years 1880 and 1913 In Africa, European exploration and technology led to the colonization of almost the entire continent by 1898. New medicines such as quinine and more advanced firearms allowed European nations to conquer native populations.[21] Motivations for the Scramble for Africa included national pride, desire for raw materials, and Christian missionary activity. Britain seized control of Egypt to ensure control of the Suez Canal, but Ethiopia defeated Italy in the First Italo-Ethiopian War at the Battle of Adwa. France, Belgium, Portugal, and Germany also had substantial colonies. The Berlin Conference of 1884-1885 attempted to reach agreement on colonial borders in Africa, but disputes continued, both amongst European powers and in resistance by the native populations. [21] In 1867, diamonds were discovered in the Kimberley region of South Africa. In 1886 gold was discovered in Transvaal. This led to colonization in Southern Africa by the British and business interests, led by Cecil Rhodes.[21] 1801-1815: First Barbary War and the Barbary War and the Second Barbary War between the United States and the Barbary States of North Africa. 1802: Tay Son army recaptured Phu Xuan, causing Vo Tanh to commit suicide, Nguyen Phuc Anh successfully captured Thang Long, founded the Nguyen dynasty 1804-1810: Fulani Jihad in Nigeria. 1804-1813: Russo-Persian War. 1806-1812: Russo-Turkish War, Treaty of Bucharest. 1807-1837: Musket Wars among Māori in many parts of New Zealand. 1808-1809: Russia conquers Finland from Sweden in the Finnish War.1816: Shaka rises to power over the Zulu Kingdom. Zulu expansion was a major factor of the Mfecane ("Crushing") that depopulated large areas of southern Africa. 1811: Battle of Tippecanoe: U.S. outnumbering Native Americans resulting in defeat and burning of community 1812–1815: War of 1812 between the United States and Britain; ends in a draw, except that Native Americans lose power. 1813-1837: Afghan-Sikh Wars. 1814-1816: Anglo-Nepalese War between Nepal (Gurkha Empire) and British Empire. 1817: First Seminole War between Nepal (Gurkha Empire) and British Empire. 1817: First Seminole War between Nepalese Southern Europe 1821-1830: Greek War of Independence against the Ottoman Empire. 1825-1830: Java War begins. 1826-1828: After the final Russo-Persian War, the Persian Empire took back territory lost to Russia from the previous war. 1828-1832: Black War in Tasmania leads to the near extinction of the Tasmanian aborigines 1830: July Revolution overthrew old line of Bourbons. 1830: November Uprising in Poland against Russia. 1830: Belgian Revolution results in Belgium's independence from Netherlands. 1830: End of the Java War. The whole area of Yogyakarta and Surakarta Manca nagara Dutch seized. 27 September, Klaten Agreement determines a fixed boundary between Surakarta and Yogyakarta and permanently divide the kingdom of Mataram was signed by Sasradiningrat, Pepatih Dalem Surakarta, and Danurejo, Pepatih Dalem Surakarta, and Pepatih Dalem Surakarta, and
Pepatih Dalem Surakarta, and Pepatih Dalem Surakarta, rebellions of Brazil 1835-1836: Texas Revolution results in Texas's independence from Mexico. 1839-1842: First Opium War begins. 1846-1848: Mexican-American War leads to Mexico's cession of much of the modern-day Southwestern United States. Louis Napoleon, nephew of Napoleon I, elected president. 1853–1856: Crimean War between France, the United Kingdom, the Ottoman Empire and Russia. 1856–1860: Second Opium War 1857: Indian Rebellion against the Company Raj. After this the power of the East India Company is transferred to the British Crown. 1859: Franco-Austrian War is part of the wars of Italian unification. 1861-1865: American Civil War, 30% of all Southern white males aged 18-40 were killed.[22] 1861-1867: French intervention in Mexico and the creation of the Second Mexican Empire, ruled by Maximilian I of Mexico and his consort Carlota of Mexico. 1863-1865: January Uprising against the Russian Empire. 1864-1870: Paraguavan population. 1866: Austro-Prussian War results in the dissolution of the German Confederation and the creation of the North German Confederation and the Austrian-Hungarian Dual Monarchy. 1868-1869: Boshin War results in end of the shogunate and the emergence of a New Imperialism. 1870: Napoleon III abdicated after unsuccessful conclusion of Franco-Prussian War. Third Republic proclaimed. 1879: Anglo-Zulu War results in British victory and the annexation of the Zulu Kingdom. 1879-1880: Little War against the Ottoman Empire. 1879: Anglo-Zulu War results in British victory and the annexation of the Zulu Kingdom. 1879-1880: Little War against the Ottoman Empire. rebel defeat. 1879-1883: Chile battles with Peru and Bolivia over Andean territory in the War of the Pacific. 1880-1881: First Boer War begins. 1881-1899: Mahdist War in Sudan. A depiction of the Battle of Omdurman, 1898. During the battle, Winston Churchill took part in a cavalry charge. 1882: Anglo-Egyptian War British invasion and subsequent occupation of Egypt 1883-1898: Mandingo Wars between the French colonial empire of the Mandingo people led by Samory Touré. 1894-1895: After the First Sino-Japanese War, China cedes Taiwan to Japan as a result of the First Sino-Japanese War. 1895-1896: Ethiopia defeats Italy in the First Italo-Ethiopian War at the Battle of Adwa. 1895-1898: Cuban War for Independence results in a Filipino victory. 1898: Spanish-American War results in the independence of Cuba. 1899-1901: Boxer Rebellion in China is suppressed by the Eight-Nation Alliance. 1899-1902: Thousand Days' War in Colombia breaks out between the "Liberales" and "Conservadores", culminating with the loss of Panama in 1903. 1899-1902: Second Boer War begins. 1899-1902: Second Boer War begins. 1899-1902: Philippine-American War begins. 1899-1902: Second Boer War begins. [24] Main article: 19th century in science The 19th century saw the birth of science as a profession; the term scientist was coined in 1833 by William Whewell, [25] which soon replaced the older term of natural philosopher. Among the most influential ideas of the 19th century were those of Charles Darwin (alongside the independent researches of Alfred Russel Wallace), who in 1859 published the book The Origin of Species, which introduced the idea of evolution by natural selection. Another important landmark in medicine and biology were the successful efforts to prove the germ theory of disease. Following this, Louis Pasteur made the first vaccine against rabies, and also made many discoveries in the field of chemistry, including the asymmetry of crystals. In chemistry, Dmitri Mendeleev, following the atomic theory of John Dalton, created the first periodic table of elements, theories and discoveries of Michael Faraday, André-Marie Ampère, James Clerk Maxwell, and their contemporaries led to the creation of electromagnetism as a new branch of science. Thermodynamics led to an understanding of heat and the notion of energy was defined. Other highlights include the discoveries unveiling the nature of atomic structure and matter, simultaneously with chemistry - and of new kinds of radiation. In astronomy, the planet Neptune was discovered. In mathematics, the notion of complex numbers finally matured and led to a subsequent analytical theory; they also began the use of hypercomplex numbers. Karl Weierstrass and others carried out the arithmetization of analysis for functions of real and complex variables. It also saw rise to new progress in geometry beyond those classical theories of Euclid, after a period of nearly two thousand years. The mathematical science of logic likewise had revolutionary breakthroughs after a similarly long period of stagnation. But the most important step in science at this time were the ideas formulated by the creators of electrical science. Their work changed the face of physics and made possible for new technology to come about including a rapid spread in the use of electric illumination and power in the last two decades of the century and radio wave communication at the end of the 1890s. Michael Faraday (1791-1867) Charles Darwin (1809-1882) 1807: Potassium and Sodium are individually isolated by Sir Humphry Davy. 1831-1836: Charles Darwin's journey on HMS Beagle. 1859: Charles Darwin publishes On the Origin of Species. 1861: James Clerk Maxwell publishes On Physical Lines of Force, formulating the four Maxwell's A Treatise on Electricity and Magnetism published. 1877: Asaph Hall discovers the moons of Mars 1896: Henri Becquerel discovers radioactivity; J. J. Thomson identifies the electron, though not by name. Robert Koch discovered the tuberculosis bacilli. In the 19th century, the disease killed an estimated 25% of the adult population of Europe. [26] 1804: Morphine first isolated 1842: Anesthesia used for the first time. 1847: Chloroform invented for the first time, given to Queen Victoria at the birth of her eighth child, Prince Leopold in 1853 1855: Cocaine is isolated by Friedrich Gaedcke. 1885: Louis Pasteur creates the first successful vaccine against rabies for a young boy who had been bitten 14 times by a rabid dog. 1889: Aspirin patented. Thomas Edison was an American inventor, scientist, and businessman who developed many devices that greatly influenced life around the world, including the motion picture camera, phonograph and long-lasting, practical electric light bulb. Built for the Netphener bus company in 1895, the Benz Omnibus was the first motor bus in history. 1804: First steam locomotive begins operation. 1816: Laufmaschine invented by Karl von Drais. 1825: First isolation of aluminium. 1827: First photograph taken (technique of heliography) by Joseph Nicephore Niepce. 1825: The Stockton and Darlington Railway, the first public railway in the world, is opened. 1826: Samuel Morey patents the internal combustion engine. 1829: First electric motor built. 1837: Telegraphy patented. 1841: The world—between Baltimore and Washington—sends demonstration message on 24 May, ushering in the age of the telegraph. This message read "What hath God wrought?" (Bible, Numbers 23:23) 1849: The safety pin and the gas mask are invented 1855: Bessemer process enables steel to be mass-produced. 1856: World's first oil refinery in Romania 1858: Invention of the phonautograph, the first true device for recording sound. 1859: The first ironclad was launched into sea by the French Navy. 1860: Benjamin Tyler Henry invents the Gatling Gun, first modern machine gun used notably in the battles of Cold Harbor and Petersburg 1862: First meeting in combat of ironclad warships, USS Monitor and CSS Virginia, during the American Civil War. 1863: First section of the London Underground opens. 1866: Successful transatlantic telegraph cable follows an earlier attempt in 1858. 1867: Alfred Nobel invents dynamite. May. 1870: Rasmus Malling-Hansen's invention the Hansen Writing Ball becomes the first commercial telephone exchange in New Haven, Connecticut. c. 1875/1880: Introduction of the widespread use of electric lighting. These included early crude systems in France and the introduction of large scale electric power utilities with the Edison Holborn Viaduct (London) and Pearl Street (New York) power stations supplying indoor electric lighting using Edison's incandescent bulb.[28][29] 1884: Sir Hiram Maxim invents the first self-powered Machine gun, the Maxim gun. 1885: Singer begins production of the 'Vibrating Shuttle'. which would become the most popular model of
sewing machine. 1886: Karl Benz sells the first commercial automobile. 1890: The cardboard box is invented. 1892: John Froelich develops and constructs the first gasoline/petrol-powered tractor. 1894: Karl Elsener invents the Swiss Army knife. 1894: First gramophone record. 1895: Wilhelm Röntgen identifies x-rays. Brigham Young led the LDS Church from 1844 until his death in 1877. 1818: The first gramophone record. congregation, the Neuer Israelitischer Tempel, is founded in Hamburg on October 18. Around the same time, through the development of Wissenschaft des Judentums, the seeds of Conservative Judaism are sown. 1830: The Church of Jesus Christ of Latter Day Saints is established. He announced to the world of the coming of "He whom God shall make manifest". He is considered the forerunner of Bahá'u'lláh, the founder of the God Worshipping Society, founds the Taiping Heavenly Kingdom. 1857: In Paris, France, Allan Kardec, publishes The Spirits' Book and founds the Spiritism. 1868: In Japan, State Shinto is established amidst the Meiji Restoration. 1869-1870: The First Vatican Council is convened, articulating the dogma of papal infallibility and promoting a revival of scholastic theology. 1871-1878: In Germany, Otto von Bismarck challenges the Catholic Church in the Kulturkampf ("Culture War") 1875: Helena Blavatsky co-founds the Theosophical Society and becomes the leading articulator of Theosophy. 1879: Mary Baker Eddy founds the Church of Christ, Scientist. The Watchtower, published by the Jehovah's Witnesses, releases its first issue. 1881: In the Sudan, Muhammad Ahmad claims to be the Mahdi, founding the Mahdist State and declaring war on the Khedivate of Egypt. 1889: Mirza Ghulam Ahmad establishes the Ahmadiyya Muslim Community. 1891: Pope Leo XIII issues the papal encyclical Rerum novarum, the first major document informing modern Catholic social teaching. The Great Exhibition in London. Starting during the 18th century, the UK was the first country in the world to industrialize. 1808: Beethoven composes his Fifth Symphony 1813: Jane Austen publishes Frankenstein; or, The Modern Prometheus. 1819: John Keats writes his six of his best-known odes. 1819: Théodore Géricault paints his masterpiece The Raft of the Medusa, and exhibits it in the French Salon of 1819 at the Louvre. 1824: Premiere of Beethoven's Ninth Symphony. 1829: Johann Wolfgang von Goethe's Faust premieres. 1833-1834: Thomas Carlyle publishes Saltor Resartus. 1837: Charles Dickens publishes Oliver Twist. 1841: Ralph Waldo Emerson publishes Self-Reliance. 1845: Frederick Douglass publishes Narrative of the Life of Frederick Douglass, an American Slave. 1847: The Bronte sisters publish Jane Eyre, Wuthering Heights and Agnes Grey. 1848: Karl Marx and Friedrich Engels publish The Communist Manifesto. 1849: Josiah Henson publishes The Life of Josiah Henson, Formerly a Slave, Now an Inhabitant of Canada, as Narrated by Himself. 1851: Herman Melville publishes Moby-Dick. 1851: Sojourner Truth delivers the speech "Ain't I a Woman?". 1852: Harriet Beecher Stowe publishes the first edition of Leaves of Grass. 1855: Frederick Douglass publishes the first edition of My Bondage and My Freedom. 1862: Victor Hugo publishes Les Misérables. 1863: Jules Verne begins publishes Alice's Adventures in Wonderland. 1869: Leo Tolstoy publishes War and Peace. Auguste Renoir, Bal du moulin de la Galette, 1876, Musée d'Orsay 1875: Georges Bizet's opera Carmen premiers in Paris. 1876: Richard Wagner's Ring Cycle is first performed in its entirety. 1883: Robert Louis Stevenson's Treasure Island is published. 1884: Mark Twain published. 1887: Sir Arthur Conan Doyle publishes his first Sherlock Holmes story, A Study in Scarlet. 1889: Vincent van Gogh paints The Starry Night. 1892: Tchaikovsky's Nutcracker Suite premières in St Petersburg. 1894: Rudyard Kipling's The Jungle Book is published 1895: Trial of Oscar Wilde and premiere of his play The Importance of Being Earnest. 1897: Bram Stoker writes Dracula. 1900: L. Frank Baum publishes The Wonderful Wizard of Oz. Main articles: Romantic poetry and Peace and Anna Karenina On the literary front the new century opens with romanticism, a movement that spread throughout Europe in reaction to 18th-century rationalism, and it develops more or less along the lines of the Industrial Revolution, with a design to react against the dramatic changes wrought on nature by the steam engine and the railway. William Wordsworth and Samuel Taylor Coleridge are considered the initiators of the new school in England, while in the continent the German Sturm und Drang spreads its influence as far as Italy and Spain. French arts had been hampered by the Napoleonic Wars but subsequently developed rapidly. Modernism began. [30] The Goncourts and Émile Zola in France and Giovanni Verga in Italy produce some of the finest naturalist novels. Italian naturalist novels are especially important in that they give a social map of the new unified Italy to a people that until then had been scarcely aware of its ethnic and cultural diversity. There was a huge literary output during the 19th century. Some of the most famous writers included the Russians Alexander Pushkin, Nikolai Gogol, Leo Tolstoy, Anton Chekhov and Fyodor Dostoyevsky; the English Charles Dickens, John Keats, Alfred, Lord Tennyson and Jane Austen; the Scottish Sir Walter Scott, Thomas Carlyle and Arthur Conan Doyle (creator of the character Sherlock Holmes); the Irish Oscar Wilde; the Americans Edgar Allan Poe, Ralph Waldo Emerson, and Mark Twain; and the French Victor Hugo, Honoré de Balzac, Jules Verne, Alexandre Dumas and Charles Baudelaire.[31] Some American literary writers, poets and novelists were: Walt Whitman, Mark Twain, Harriet Beecher Stowe, Joel Chandler Harris, and Emily Dickinson to name a few. The reformers who advocated the adoption of European institutions and technology, have often been portrayed as the progressive elements of continuity, who viewed with alarm the dismantling of the Islamic order and sought to preserve tradition and retain the values and ideals that had served Ottoman and Islamic society so well for so long, are sometimes portrayed as nothing but archaic reactionaries. But we should avoid these simplistic characterizations if we are to appreciate the agonizing and dangerous process of transforming an established religious, social and political worldview. ^ "The First Telephone Call". www.americaslibrary.gov. progressiva caracterizada pela redução ou interrupção do fluxo sanguíneo nas artérias que irrigam os membros inferiores. Essa obstrução é causada, na maioria dos casos, pelo acúmulo de placas de gordura nas paredes das artérias, um processo conhecido como ateros doenca afeta milhões de pessoas no mundo, principalmente acima dos 50 anos, e pode evoluir silenciosamente por anos até apresentar sintomas mais graves, como dor ao caminhar ou até gangrena. Conhecer suas causas e fatores de risco é essencial para a prevenção e diagnóstico precoce. O que é a obstrução arterial periférica? A obstrução arterial periférica ocorre quando há estreitamento ou bloqueio das artérias periféricas, que são responsáveis por levar sangue rico em oxigênio aos membros, especialmente às pernas. O comprometimento do fluxo sanguíneo impede que os músculos e tecidos recebam o suprimento necessário, gerando sintomas como dor, fraqueza ou sensação de queimação nos membros inferiores. Nos estágios mais avançados, a falta de sangue pode causar feridas que não cicatrizam e risco de amputação. Embora a doença possa afetar outras regiões do corpo, o termo "periférica" geralmente se refere à circulação das pernas, que é onde os sintomas costumam aparecer primeiro. Por que essa obstrução acontece? O principal mecanismo por trás da obstrução arterial periférica é a aterosclerose, que é o acúmulo progressivo de placas endurecem e estreitam o vaso sanguíneo, dificultando ou bloqueando totalmente a passagem do sangue. Esse processo pode ocorrer em qualquer artéria do corpo, mas é particularmente perigoso nas artérias das pernas, pois interfere diretamente na mobilidade e qualidade de vida do paciente. Quais são as causas e fatores de risco? Embora a aterosclerose seja a causa mais comum, diversos fatores contribuem para o desenvolvimento da obstrução arterial periférica. Alguns deles são modificáveis, ou seja, podem ser controlados com mudanças de hábitos e tratamento médico. Outros, como idade e predisposição genética, não podem ser alterados, mas devem ser monitorados com atenção. Principais fatores de risco: Tabagismo: é o fator de risco mais fortemente associado à DAOP. O cigarro danifica diretamente as paredes dos vasos sanguíneos, acelera a aterosclerose e compromete a oxigenação dos tecidos. Diabetes mellitus: aumenta significativamente o risco de obstrução arterial; a pressão alta lesa o endotélio vascular, facilitando a formação de placas de gordura. Colesterol elevado (dislipidemia): níveis elevados de LDL (colesterol ruim) e triglicérides favorecem o depósito de gordura nas artérias. Idade avançada: o risco aumenta consideravelmente a partir dos 60 anos. Histórico familiar de doenças cardiovasculares: fatores genéticos podem predispor à aterosclerose. Sedentarismo: a falta de atividade física contribui para a progressão da doença. Obesidade: especialmente quando associada à síndrome metabólica. Existe alguma causa menos comum? Sim. Em casos mais raros, a obstrução arterial pode ser causada por: Doenças vasculares inflamatórias (vasculites) Aneurisma de poplítea, que pode causar a embolização de trombos arteriais prévias associadas a trombofilias Embolias, geralmente oriundas do coração em pacientes com arritmias ou valvopatias Traumas arteriais No entanto, essas causas representam uma minoria dos casos, e a aterosclerose permanece como a origem predominante. Quais os sintomas da obstrução arterial periférica? Nos estágios iniciais, a obstrução arterial pode não causar sintomas perceptíveis. Por isso, é comum o diagnóstico ser feito apenas quando a doença já está mais avançada. Os sintomas clássicos incluem: Claudicação intermitente: dor, queimação ou cãibras na perna ao caminhar, que aliviam com o repouso Sensação de frio no pé afetado Pele pálida Crescimento lento das unhas ou dos pelos na perna Feridas que não cicatrizam Dor mesmo em repouso (estágio avançado) Necrose ou gangrena (estágio avançado) A presença desses sintomas deve motivar uma avaliação médica urgente, pois o atraso no diagnóstico pode levar à perda do membro. Como prevenir a obstrução arterial periférica? A prevenção envolve controle rigoroso dos fatores de risco e mudancas no estilo de vida. As principais medidas incluem: Controlar diabetes, hipertensão e colesterol Manter uma alimentação balanceada Praticar exercícios físicos regularmente Manter o peso adequado Fazer check-ups vasculares periódicos, especialmente em grupos de risco Qual a relação com outras doenças cardiovasculares? A obstrução arterial periférica é considerada um marcador de alto risco cardiovascular. Pacientes com DAOP têm maior probabilidade de apresentar infarto do miocárdio e AVC (acidente vascular cerebral), pois a aterosclerose tende a afetar múltiplos territórios vasculares. Por isso, o tratamento da DAOP deve envolver abordagem global da saúde cardiovascular, com foco não apenas na circulação das pernas, mas também na prevenção de eventos maiores e potencialmente fatais. Conclusão A obstrução arterial periférica é uma doença grave, progressiva e frequentemente silenciosa, que compromete a circulação das pernas e pode levar a complicações severas se não for tratada a tempo. A principal causa é a aterosclerose, favorecida por fatores como tabagismo, diabetes, hipertensão e colesterol alto. O conhecimento dos sintomas, a identificação dos fatores de risco e a adoção de um estilo de vida saudável são fundamentais para prevenir ou retardar o avanço da doença. Em casos suspeitos, a avaliação precoce com um cirurgião vascular pode fazer toda a diferença no prognóstico e na qualidade de vida do paciente. Suspeita de obstrução nas pernas? Agende uma avaliação vascular e descubra como proteger sua circulação. A prevenção começa com o primeiro passo.
